

# All You Can Seal

Making inflatables on 3D printer!

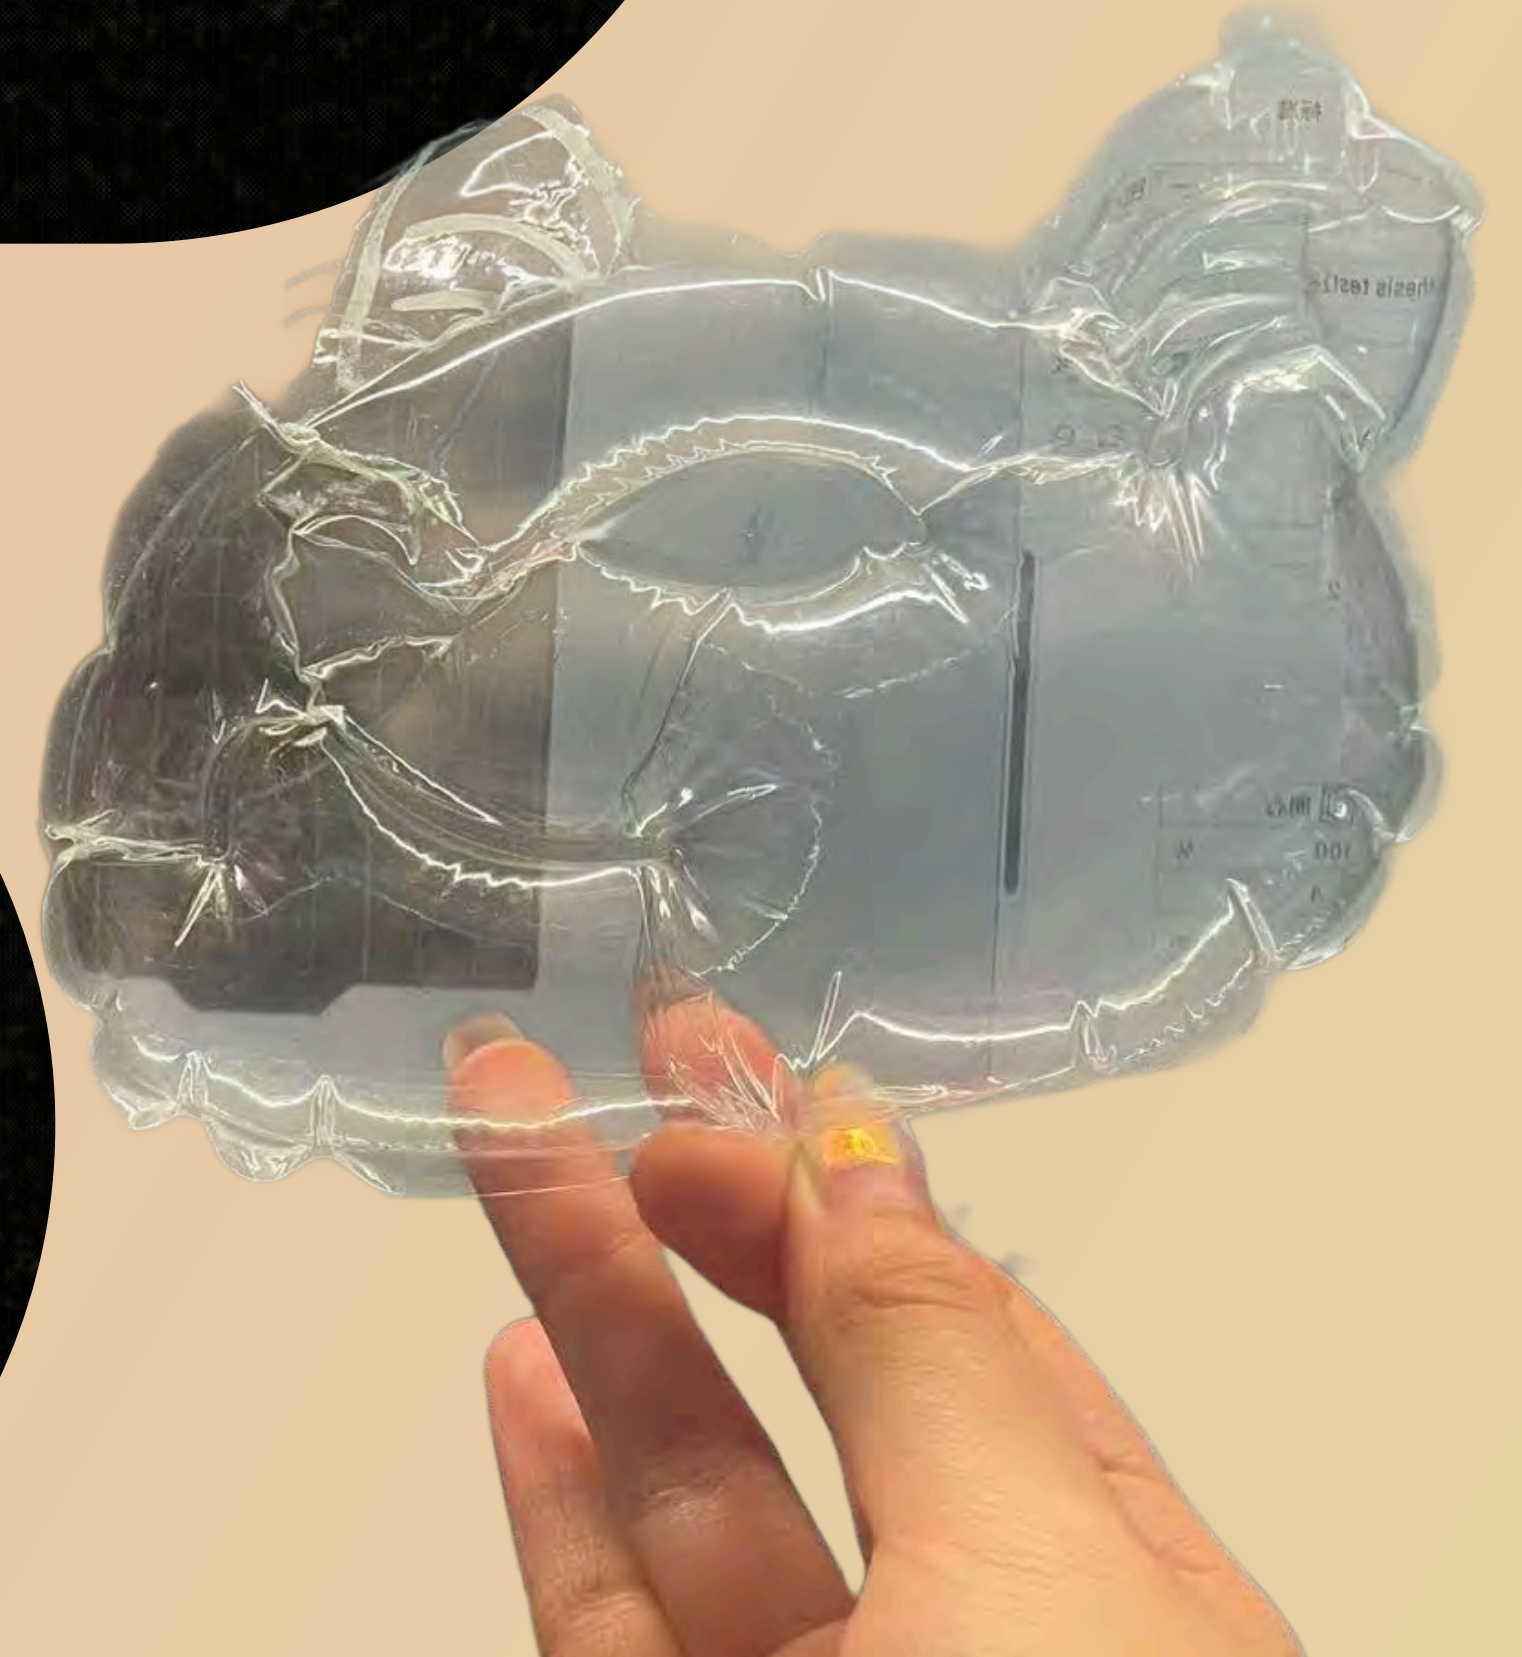

Thea Lu

Here are  
some fun  
things  
you could  
make ..

# What you need.....

Adobe  
Illustrator

any vector  
design tool

any CAD  
software

And Bumbu  
Studio

# What you need.....

any Bambu 3D  
printer

Silicone  
mat/thick  
cardboard

Tapes

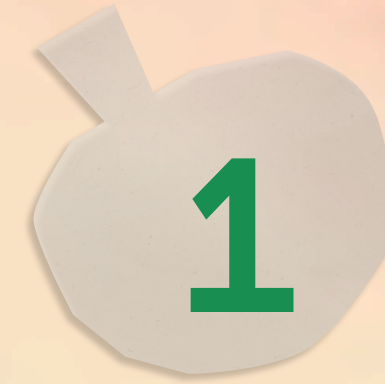

Parchment  
paper

TPU filament and  
films

# Workflow Overview

Find/make the shape

Make it into a 3d  
file

Prepare the initial  
files

Modify the Gcode and  
prepare the plate

Let printer do the  
work

1

## Find/make the shape

Create simple shape in  
any Vector design tool you like  
Or  
You can find some free svg online

Here is my favourite place:  
<https://thenounproject.com/icons/>

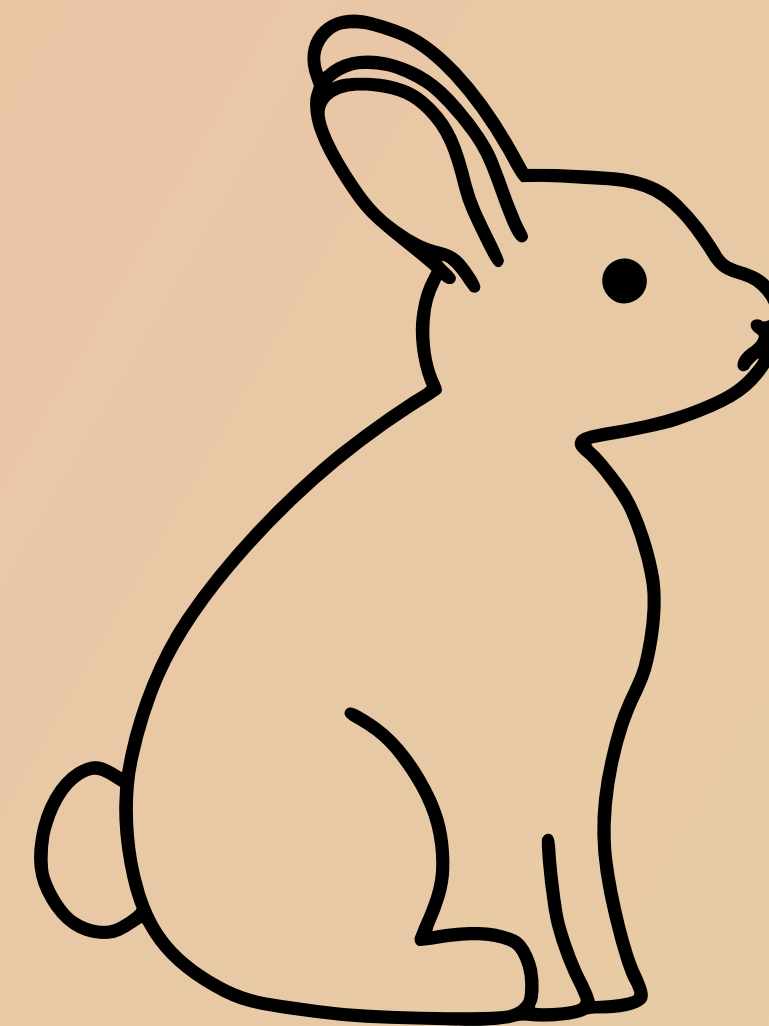

some  
tips

NO

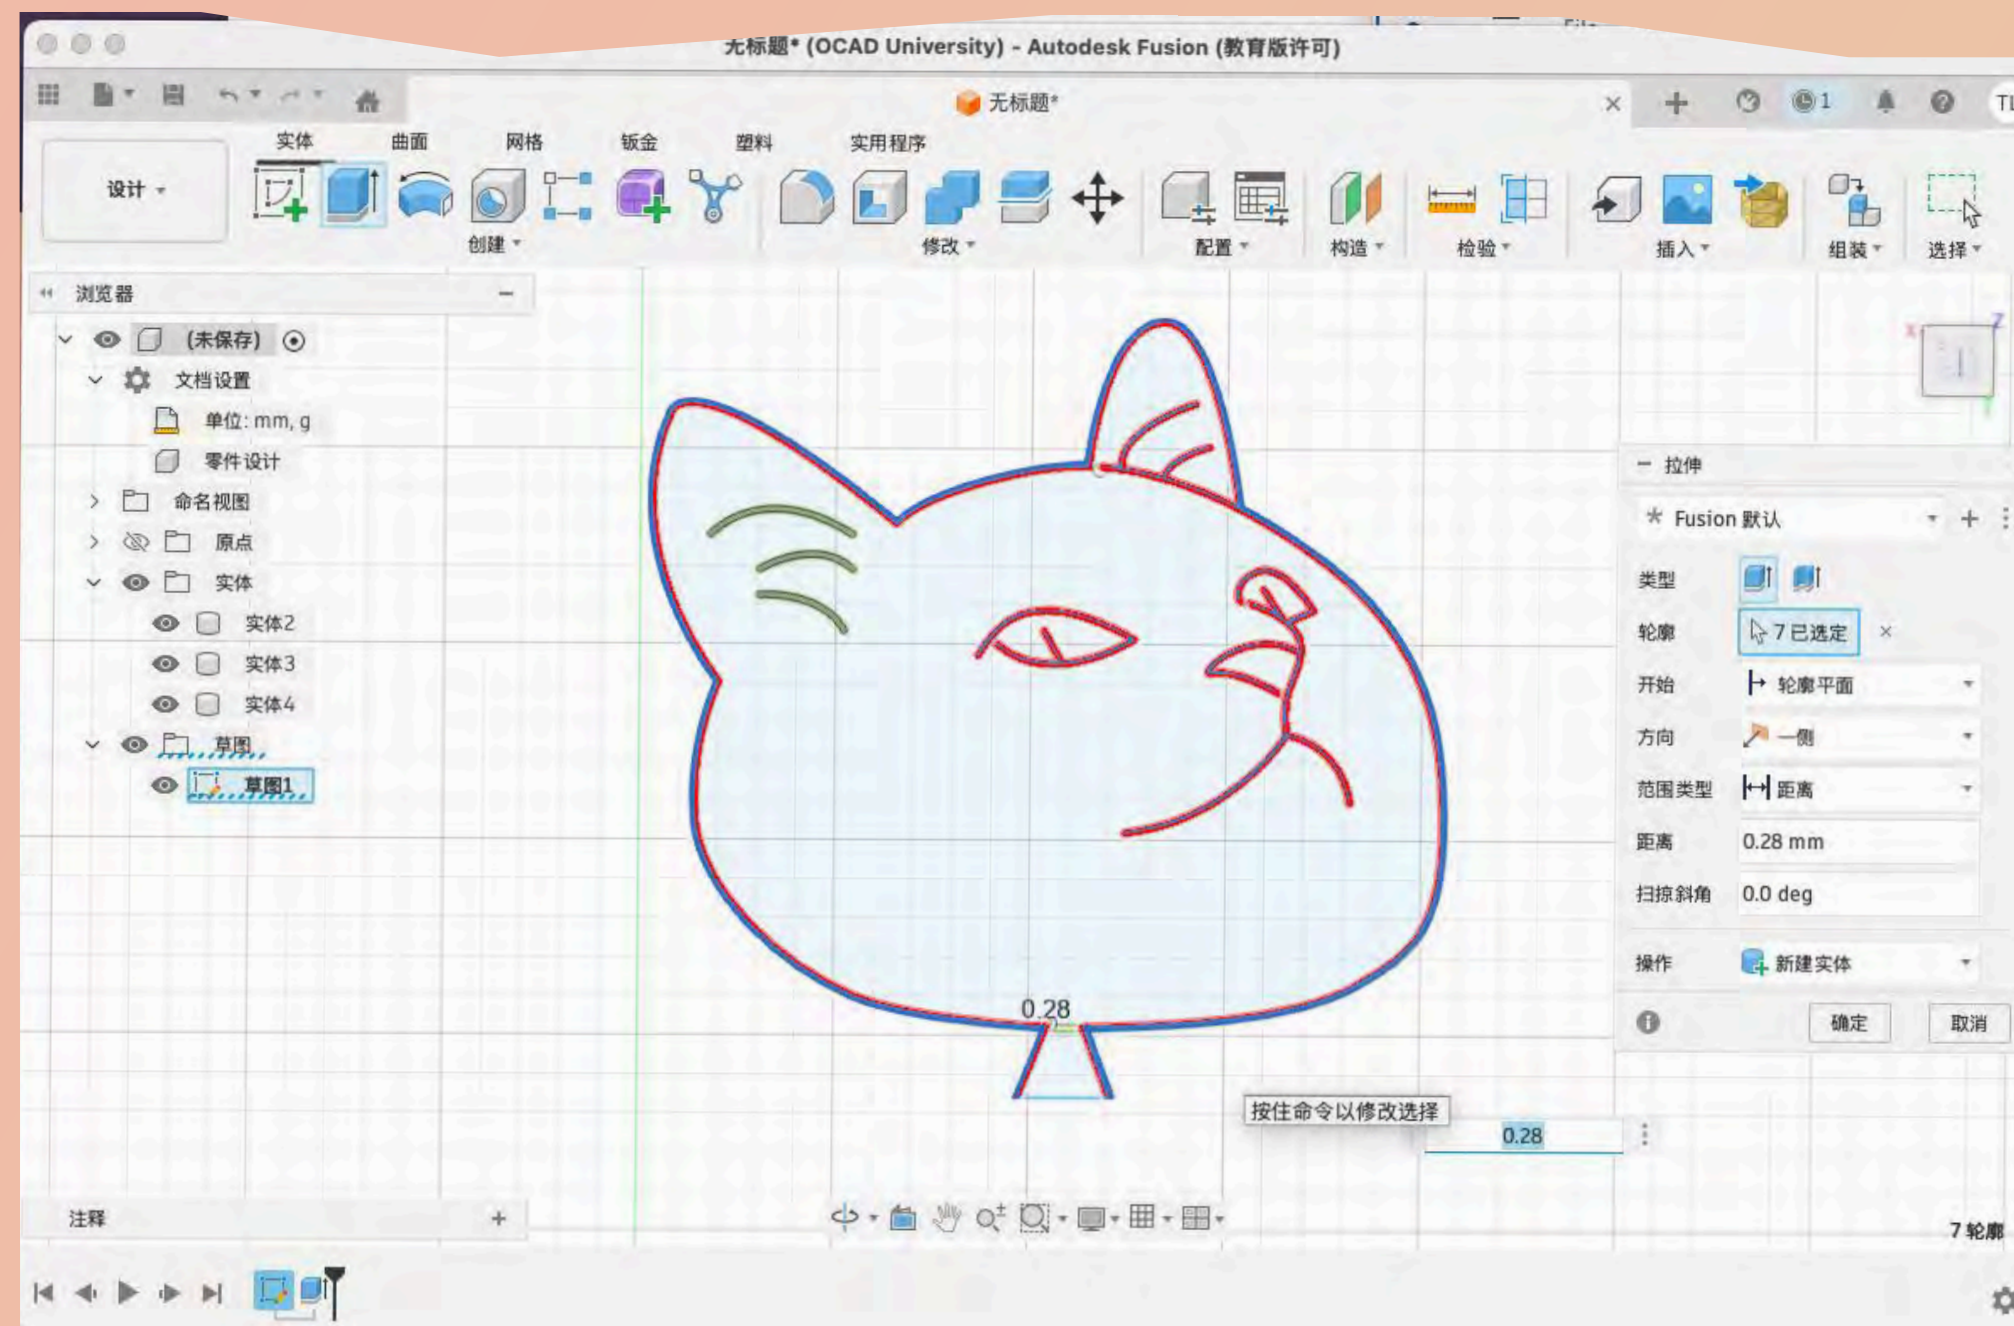

YES

Make it into a 3d STL file

Import the svg file to CAD  
software,  
Adjust the size and strike  
thickness.  
Strike thickness :minimal 2mm  
Height:0.28mm  
Export out as STL.

插入

选择

贴图

画布

插入 SVG

插入 DXF

插入网格

插入零部件

插入紧固件

含联接复制

插入衍生对象

插入 McMaster-Carr 零部件

插入制造商零件

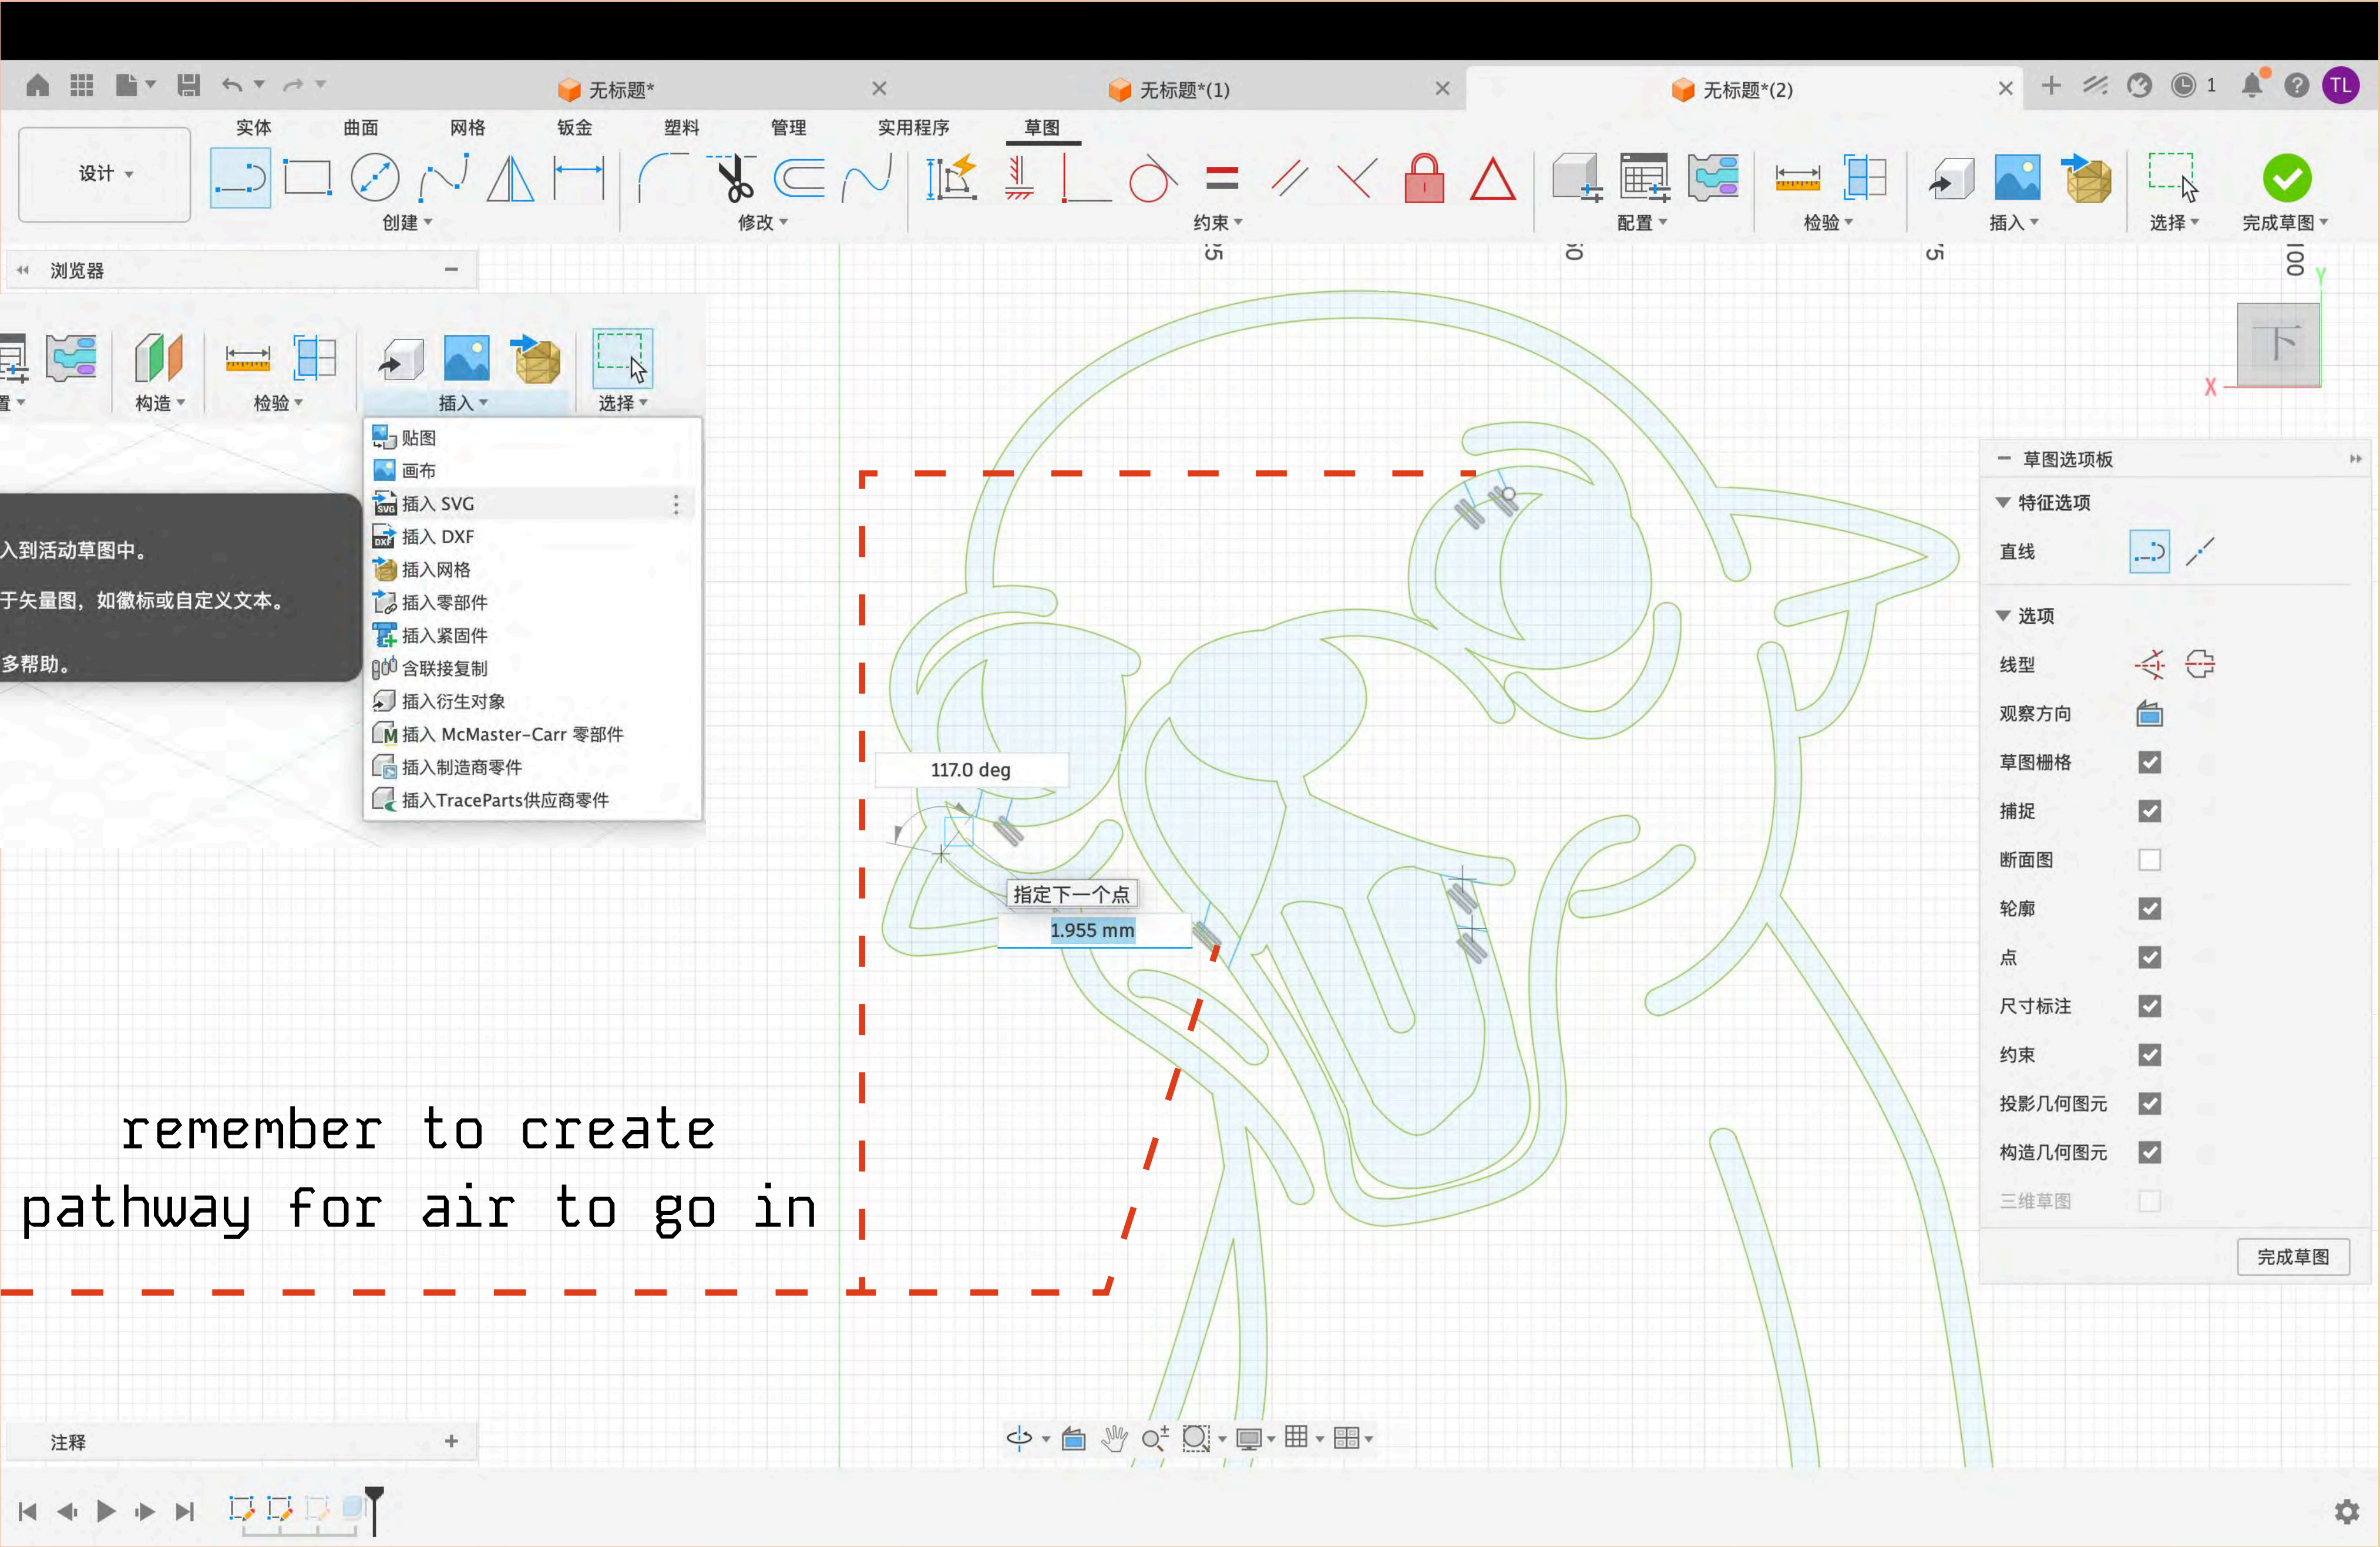

插入TraceParts供应商零件

将 SVG 文件导入到活动草图中。

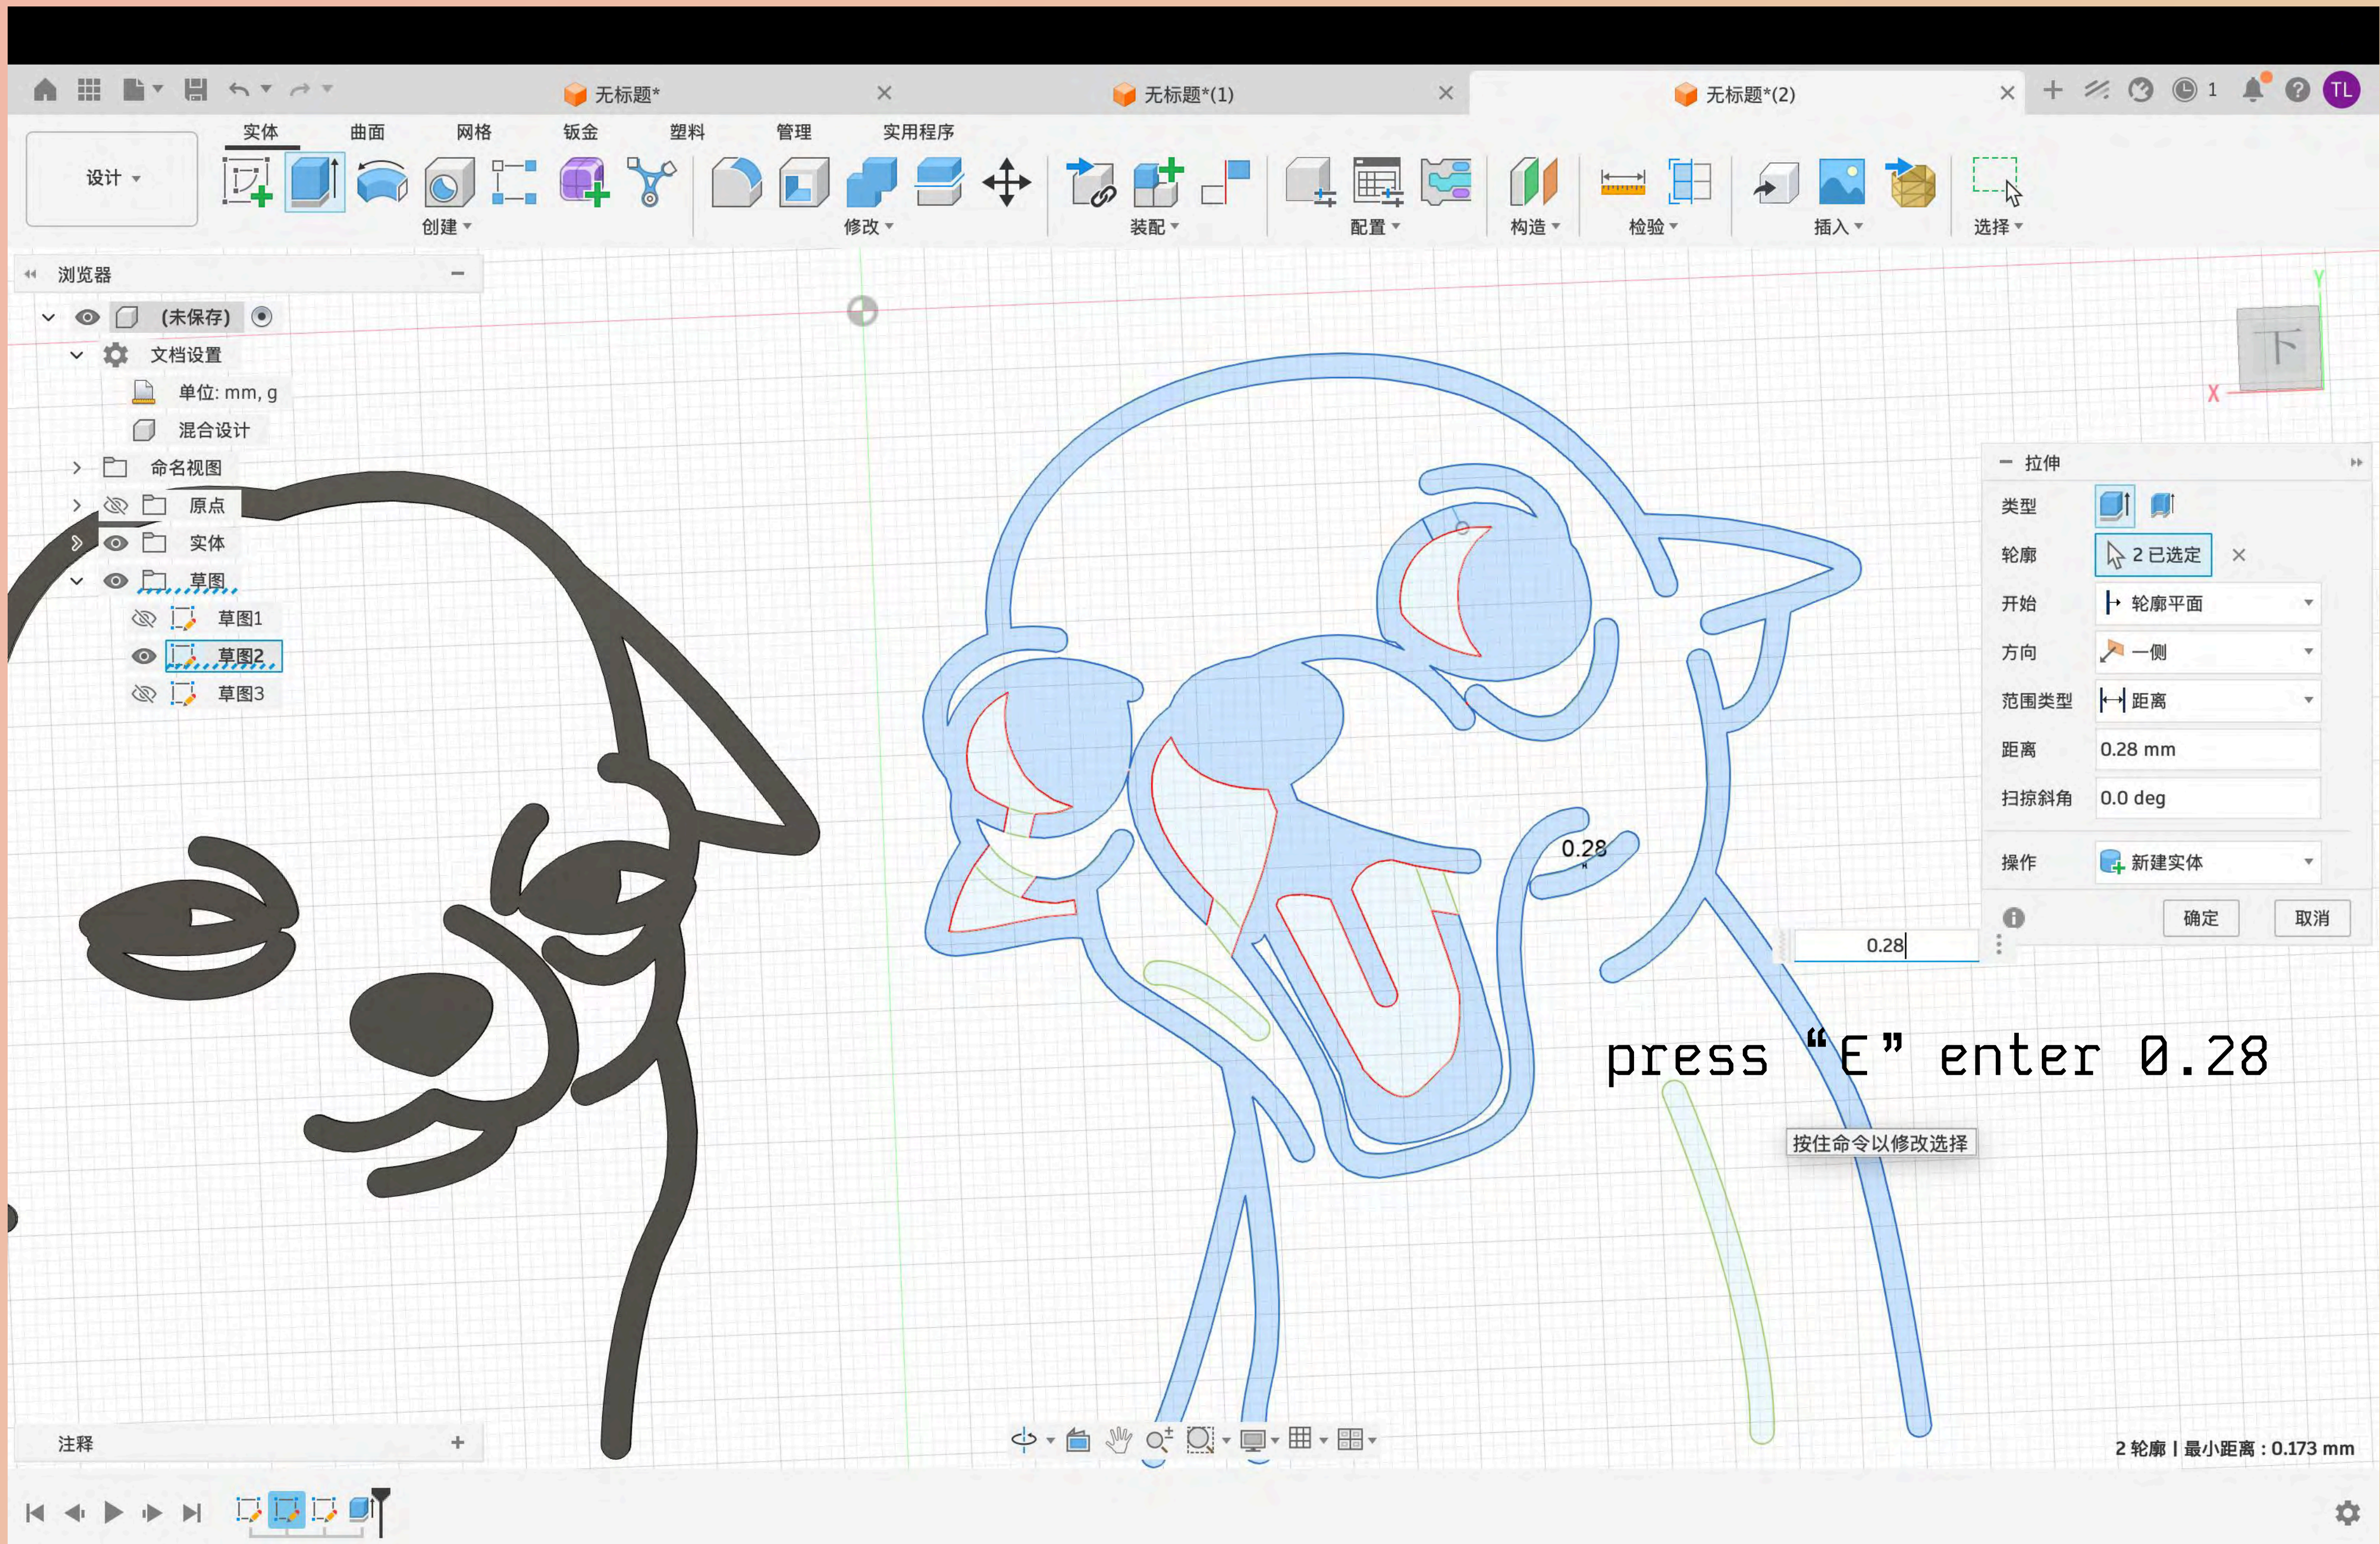

将 SVG 文件用于矢量图，如徽标或自定义文本。

按 **⌘/** 以获取更多帮助。

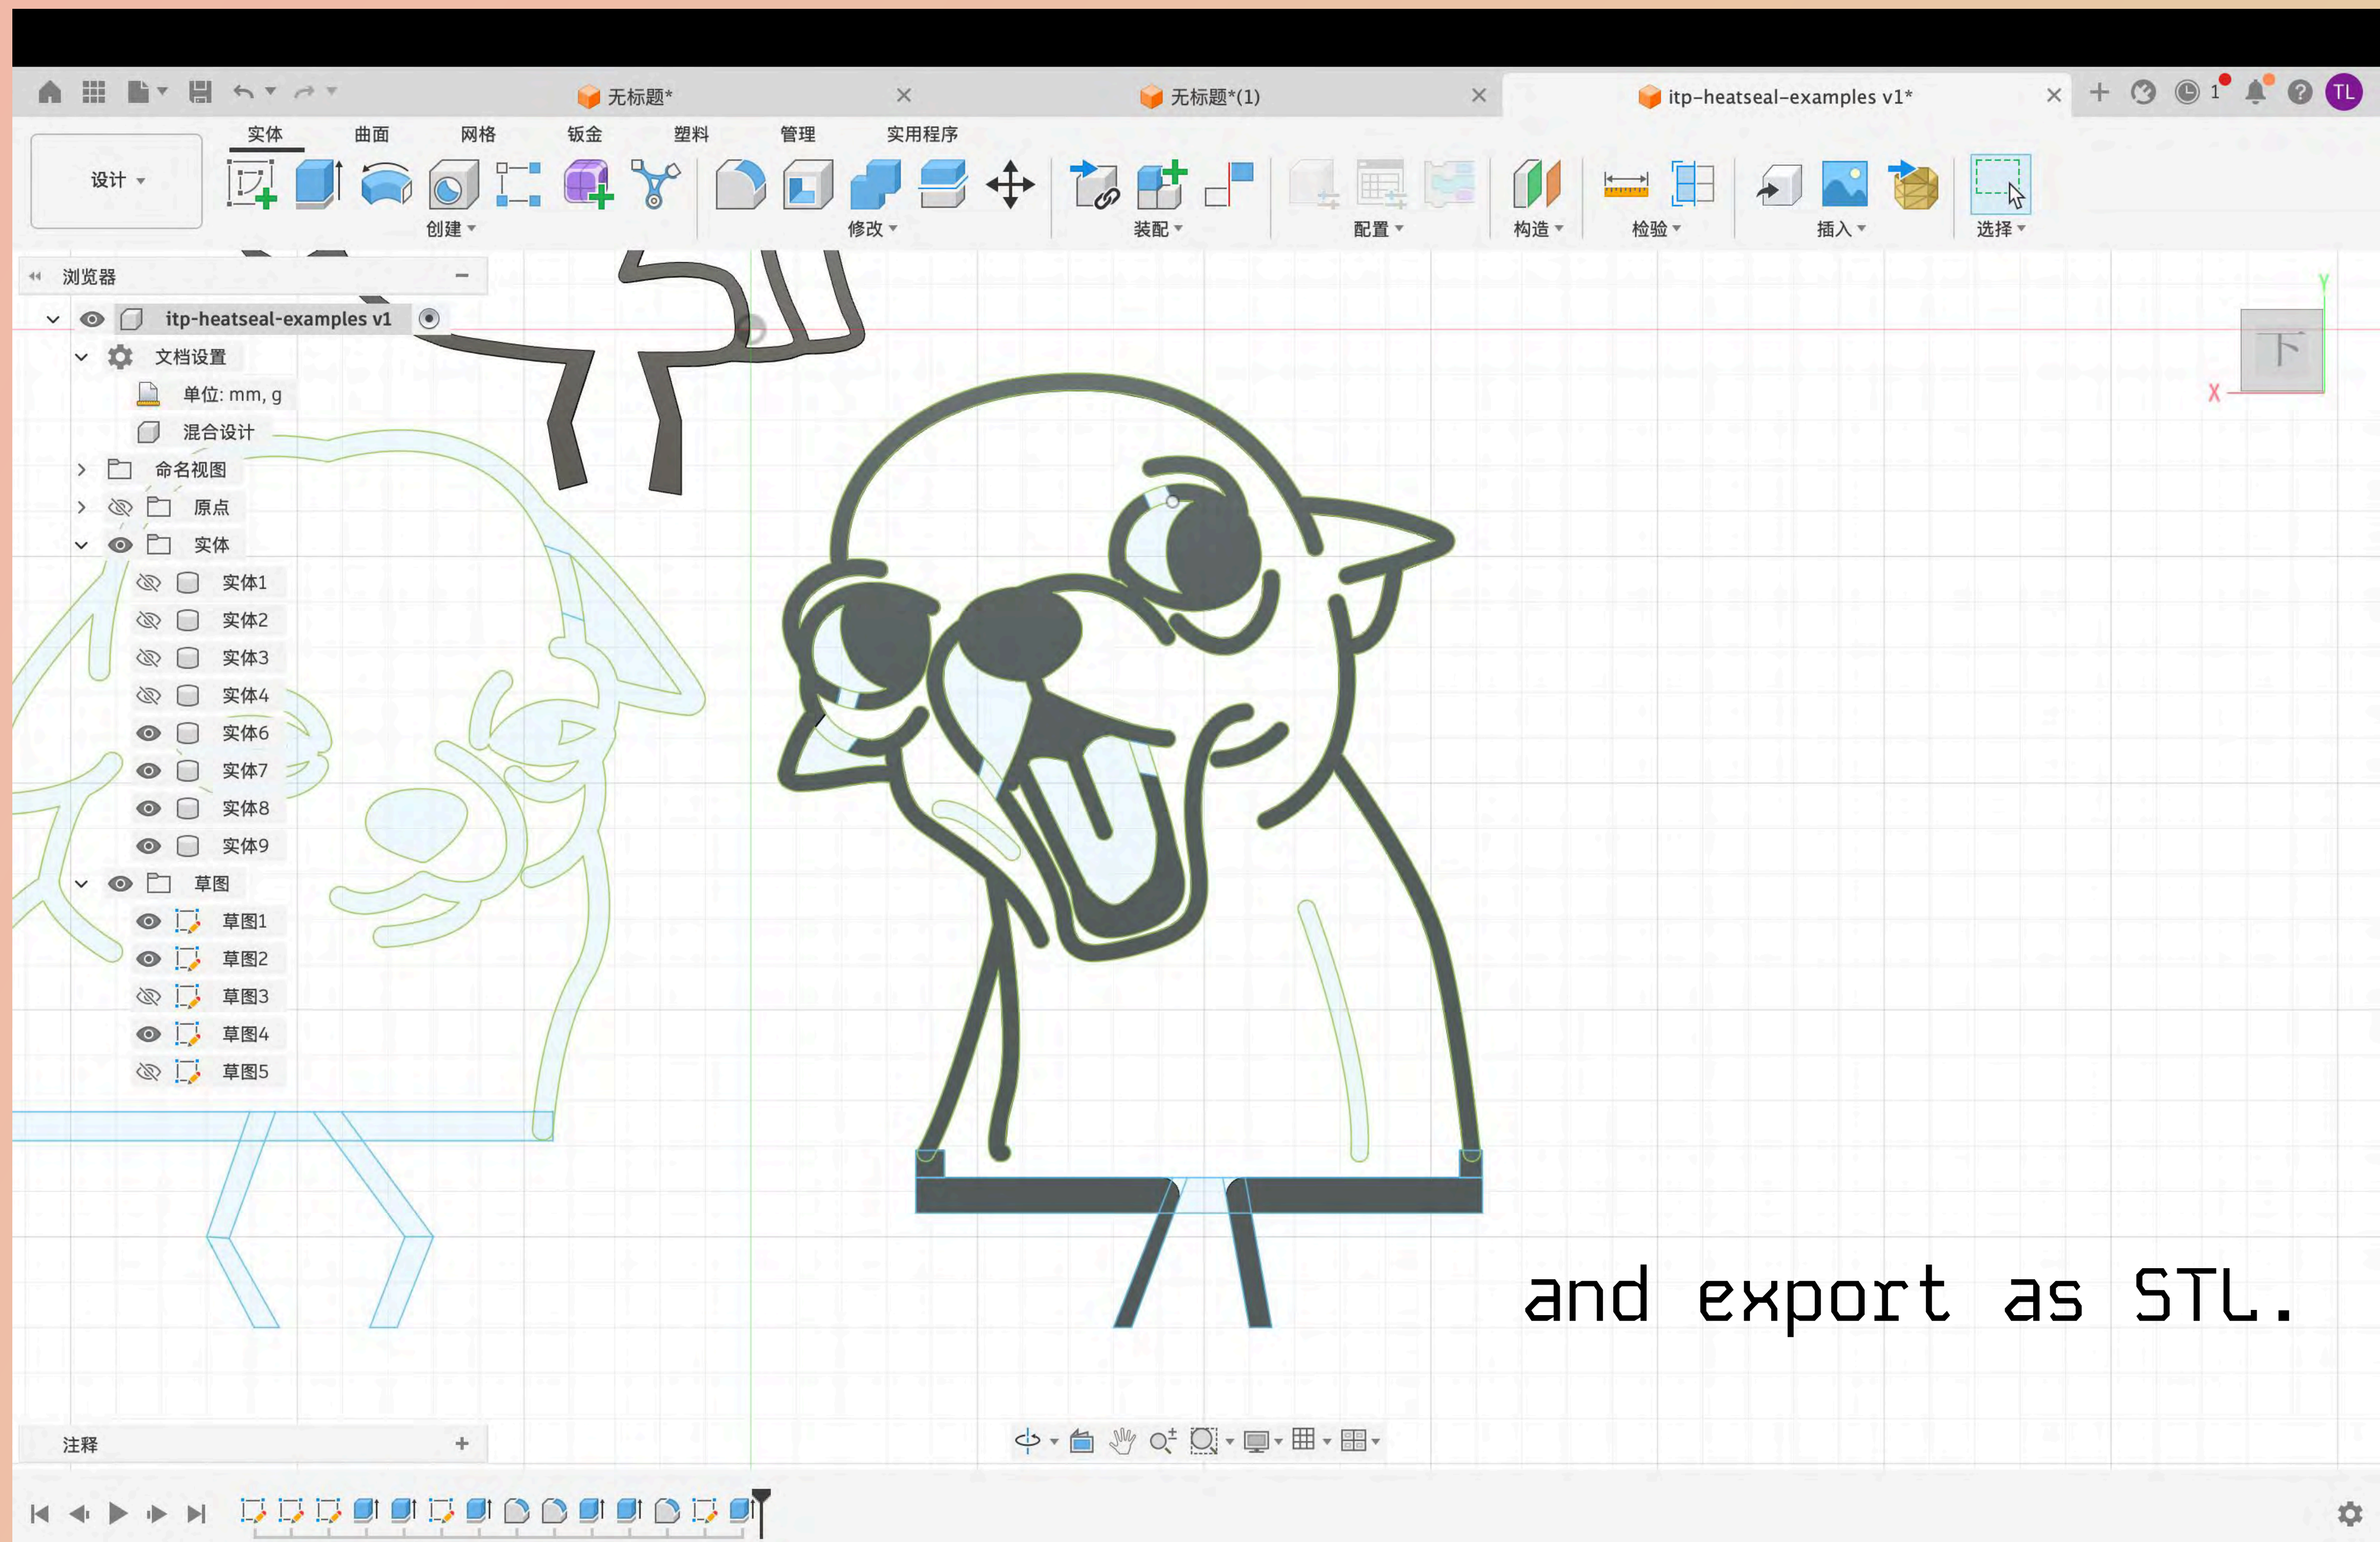

remember to create  
pathway for air to go in

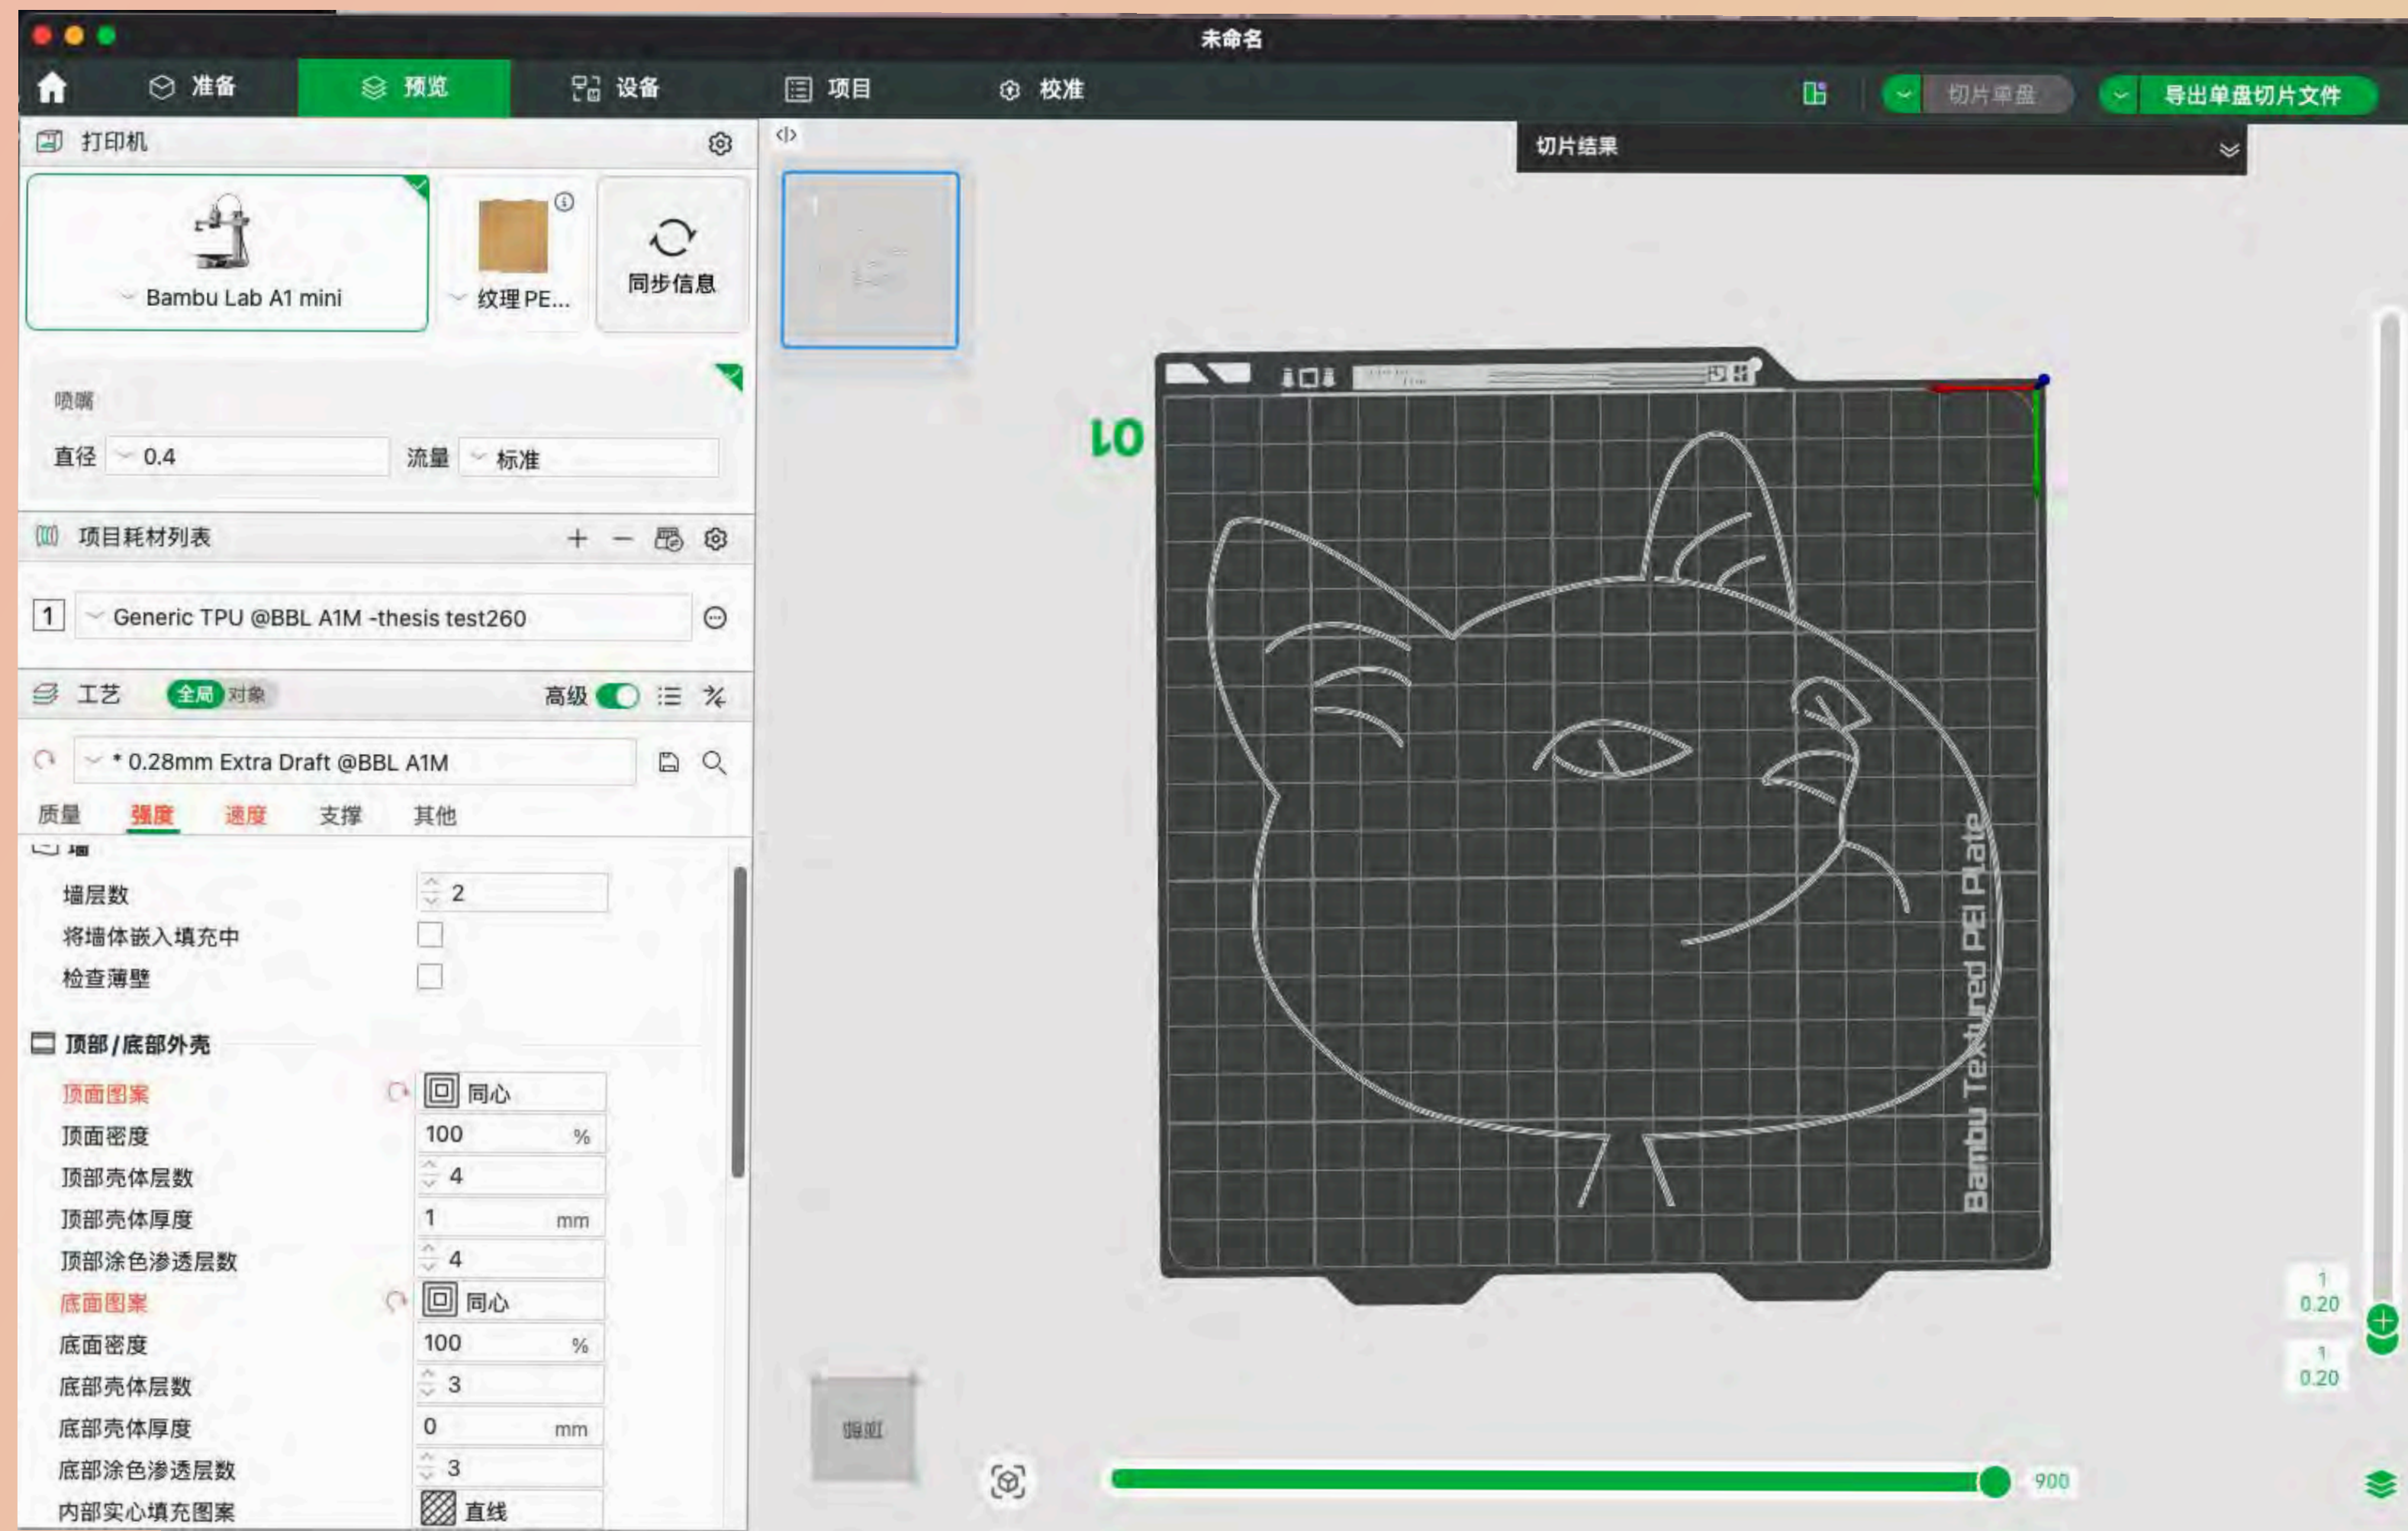

and export as STL.

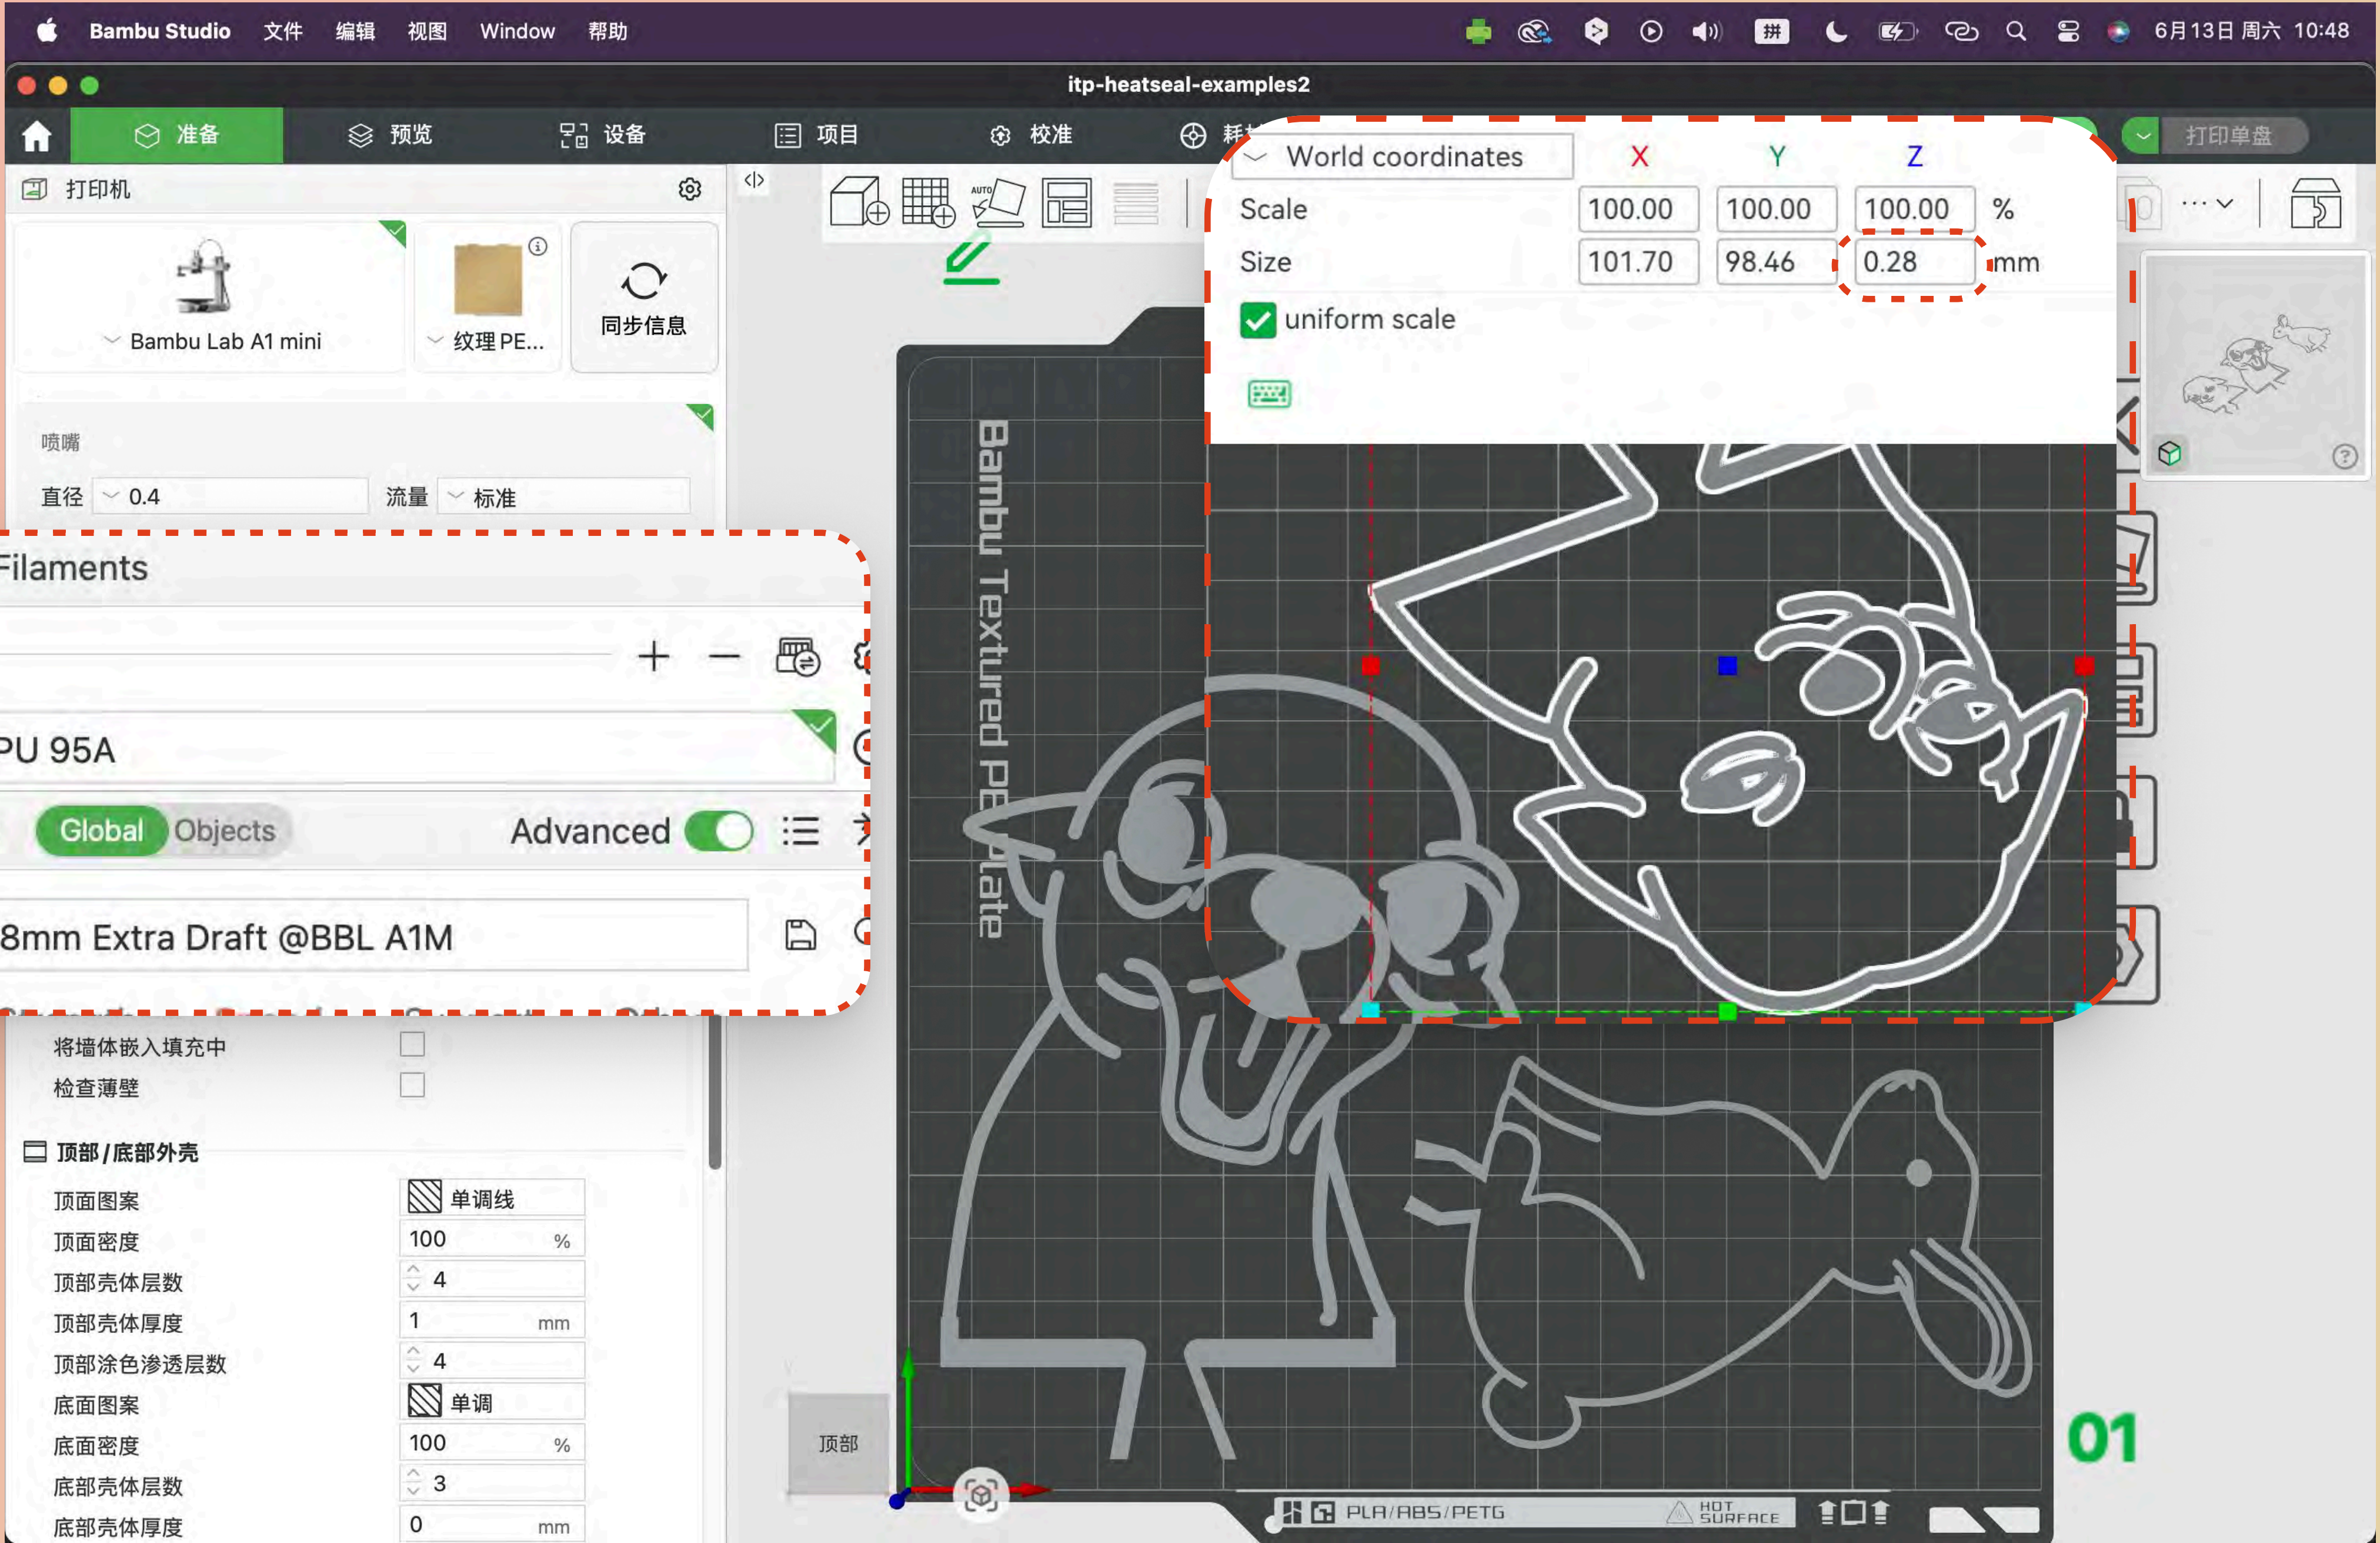

## Prepare the initial files

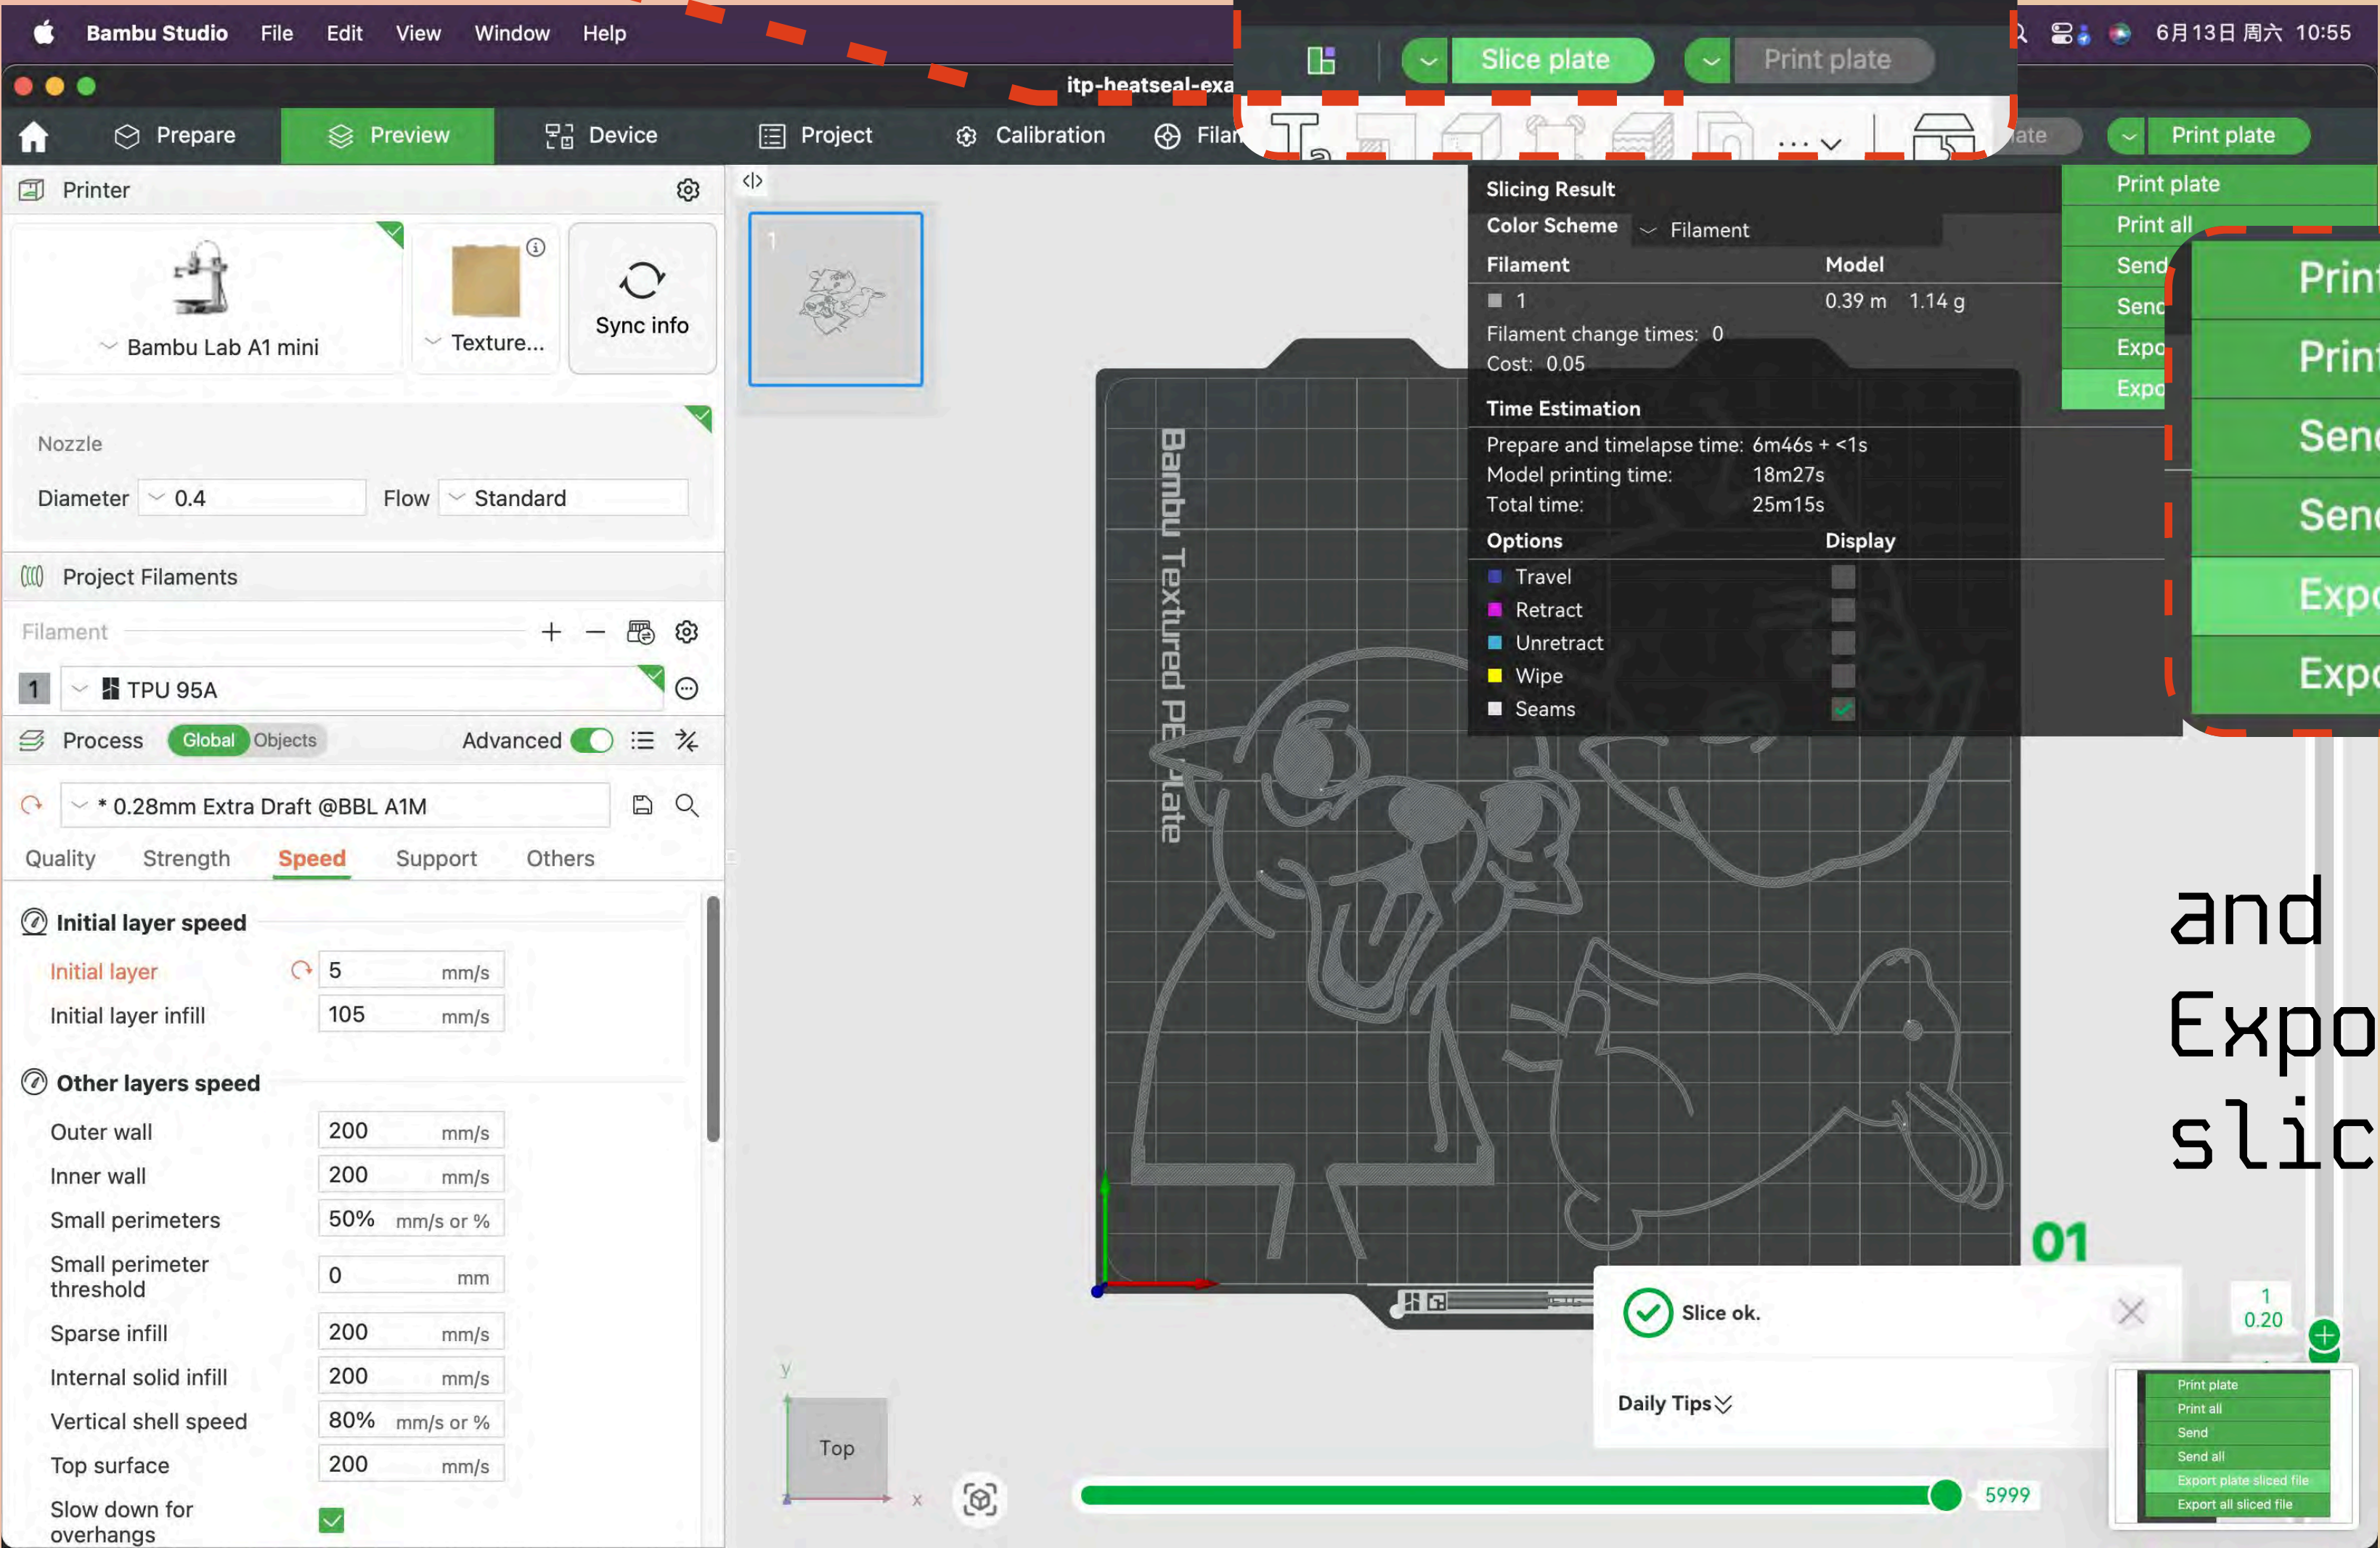

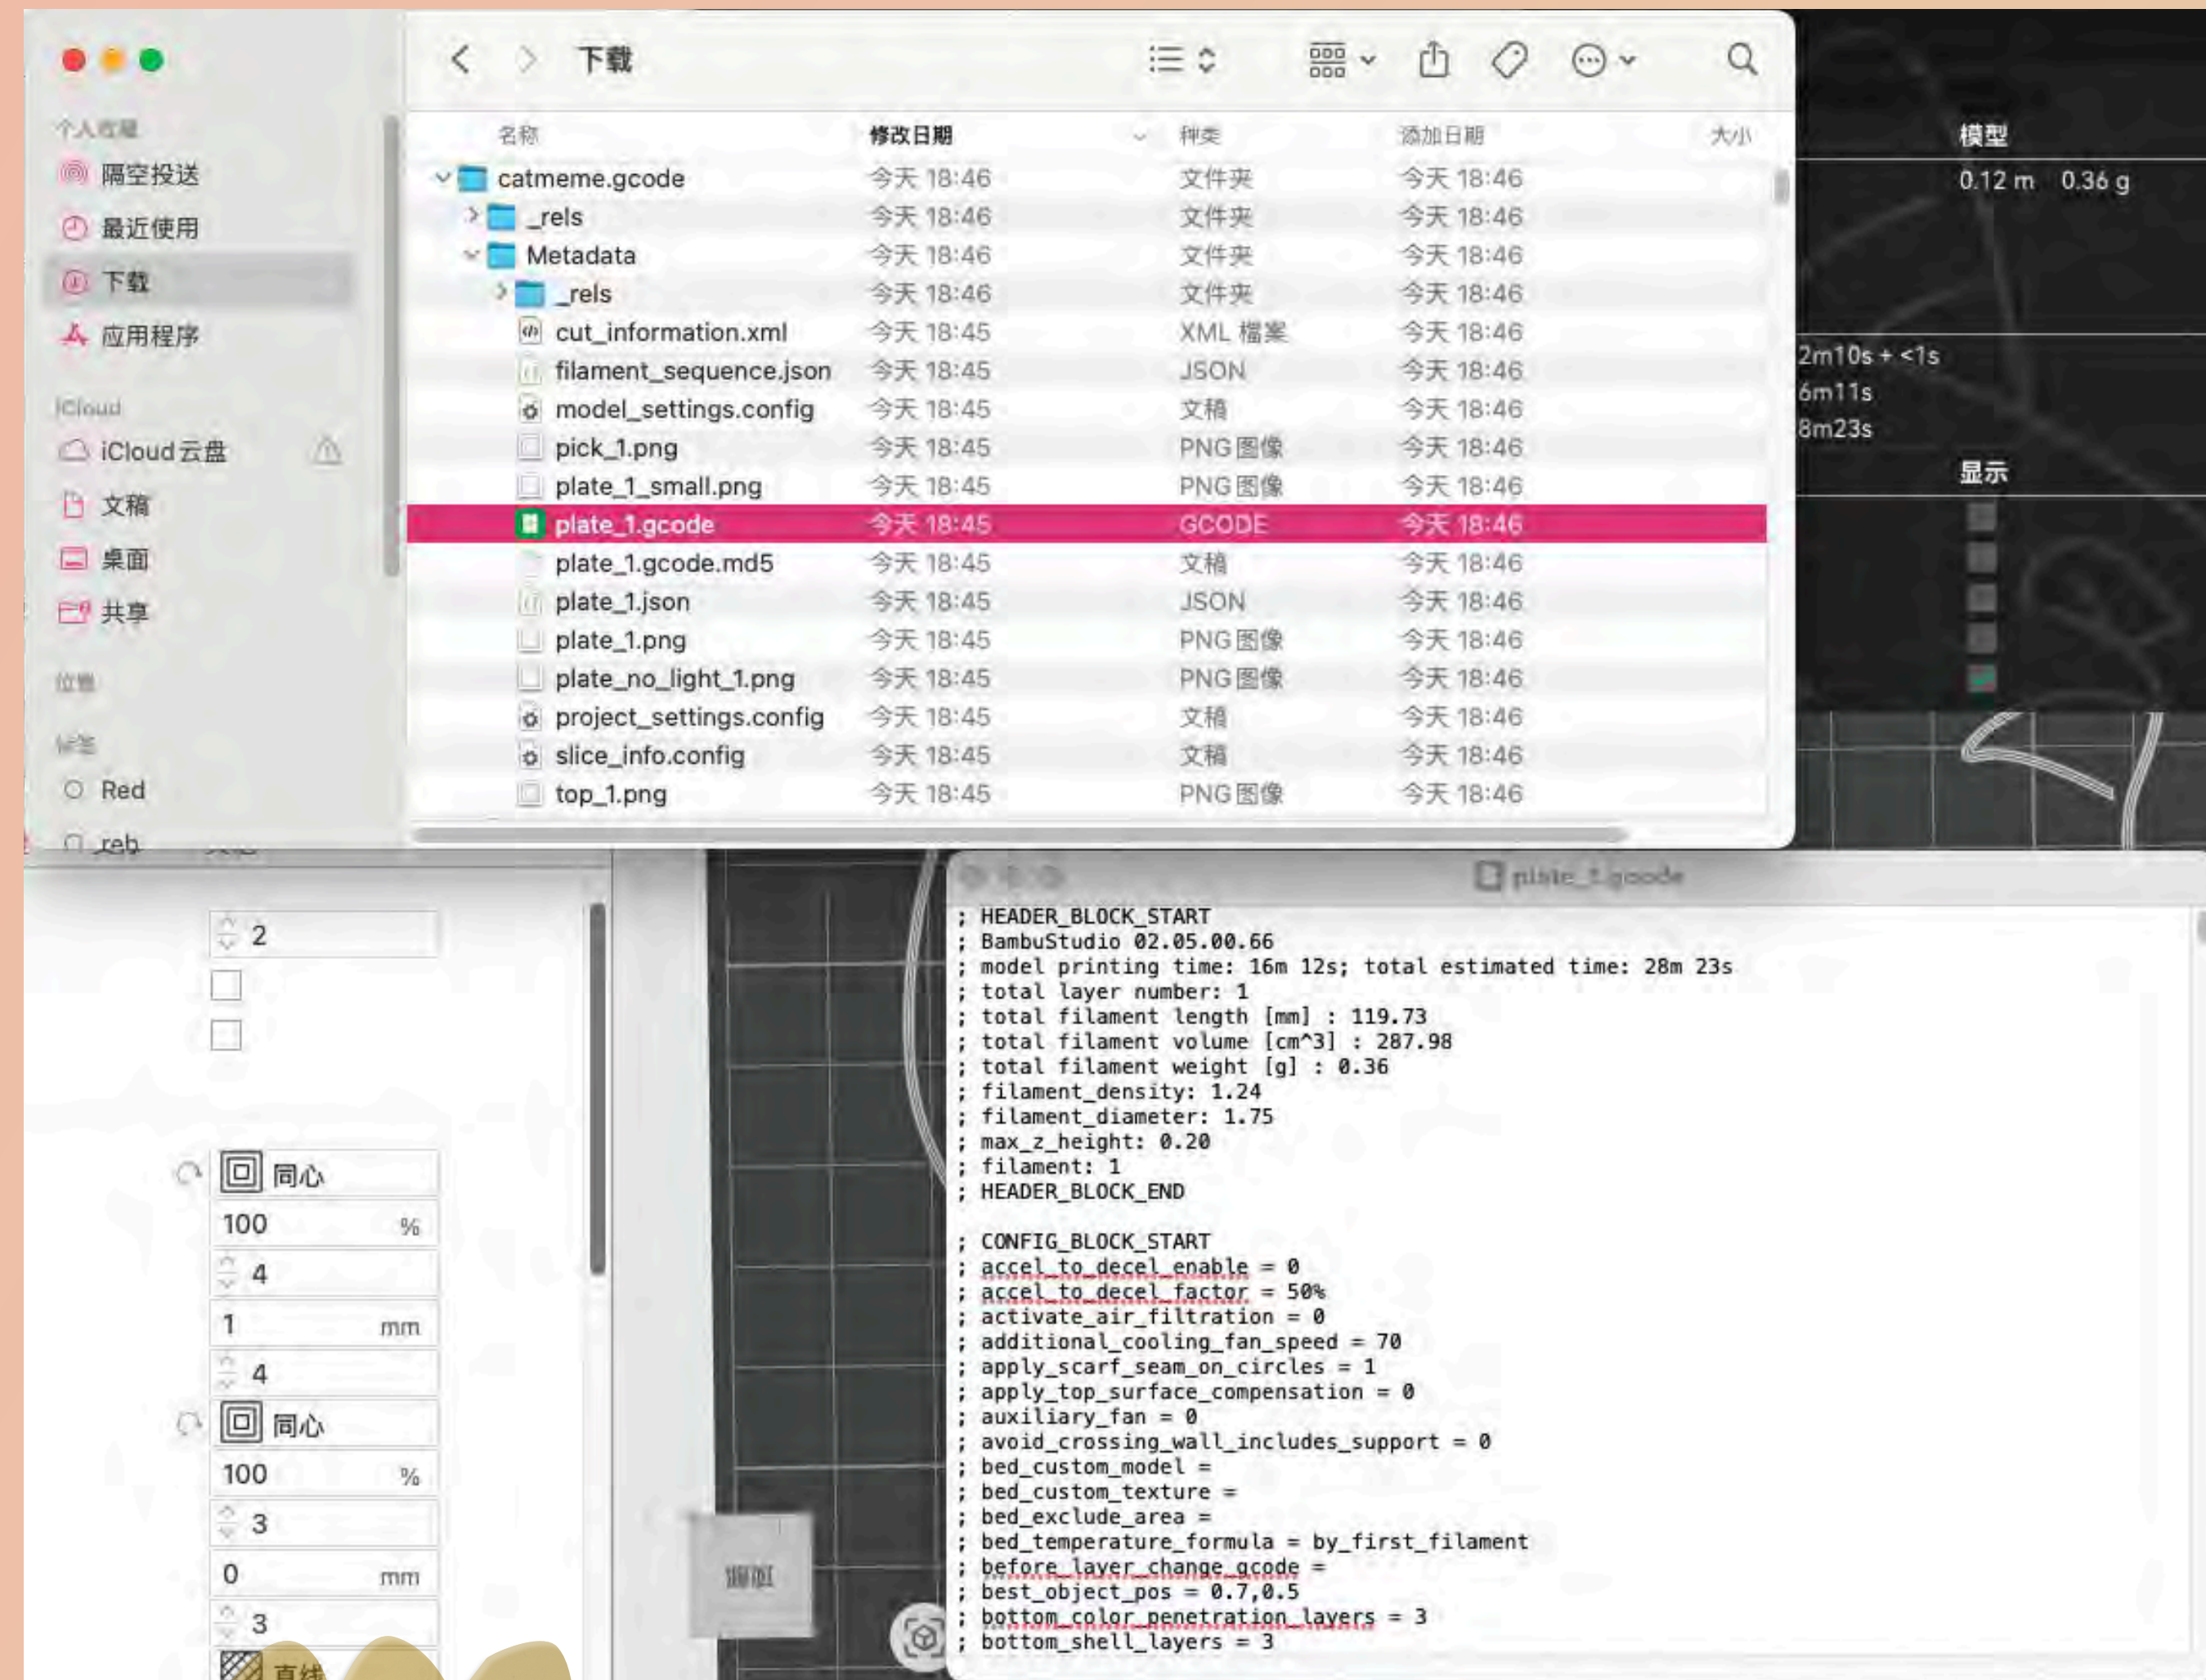

slice here

and export as  
Export plate  
sliced file

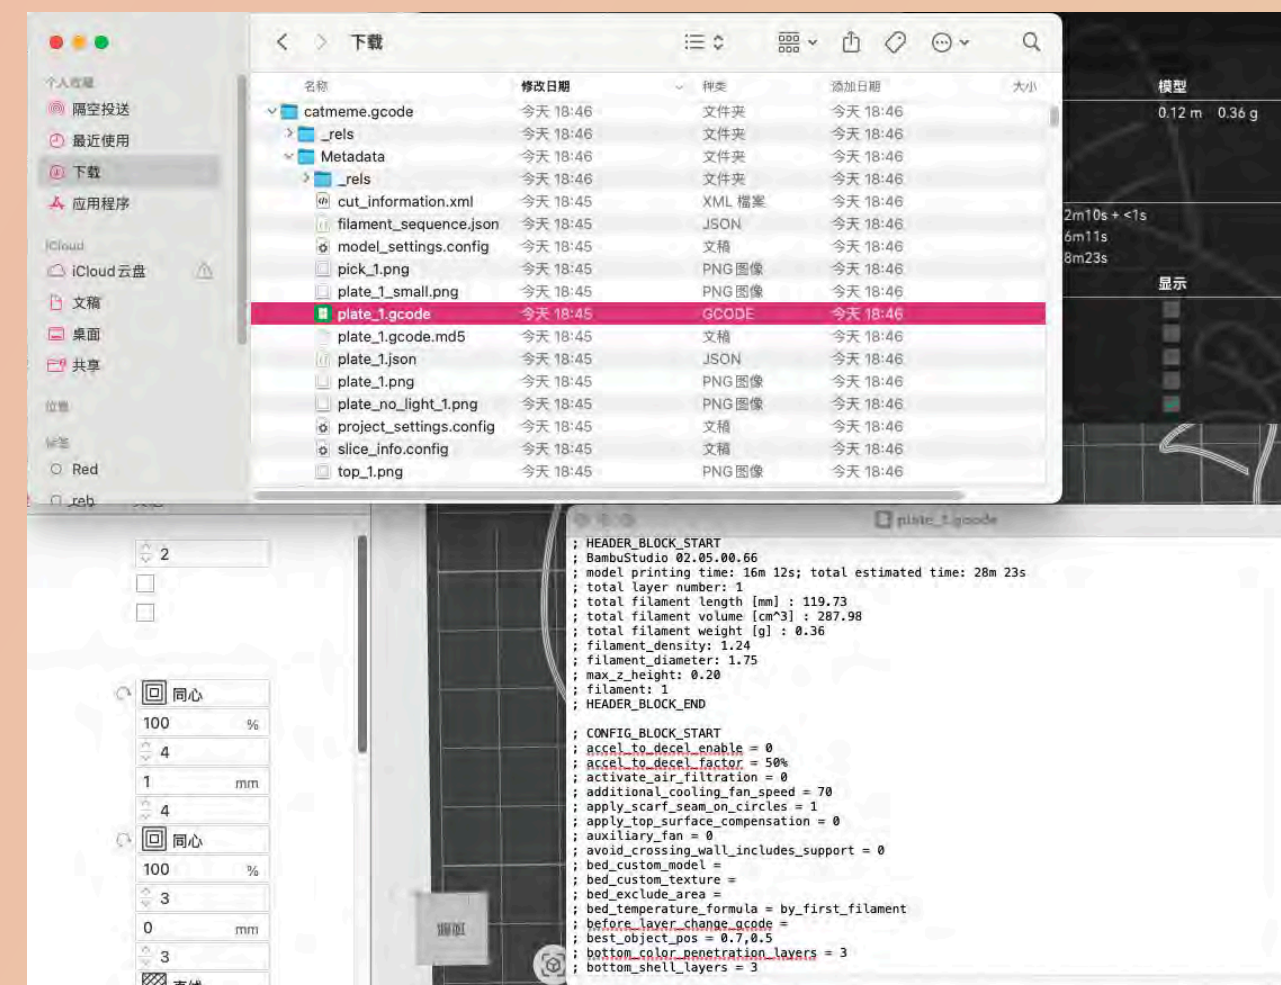

4

Modify the Gcode

# How to fool Bambu....

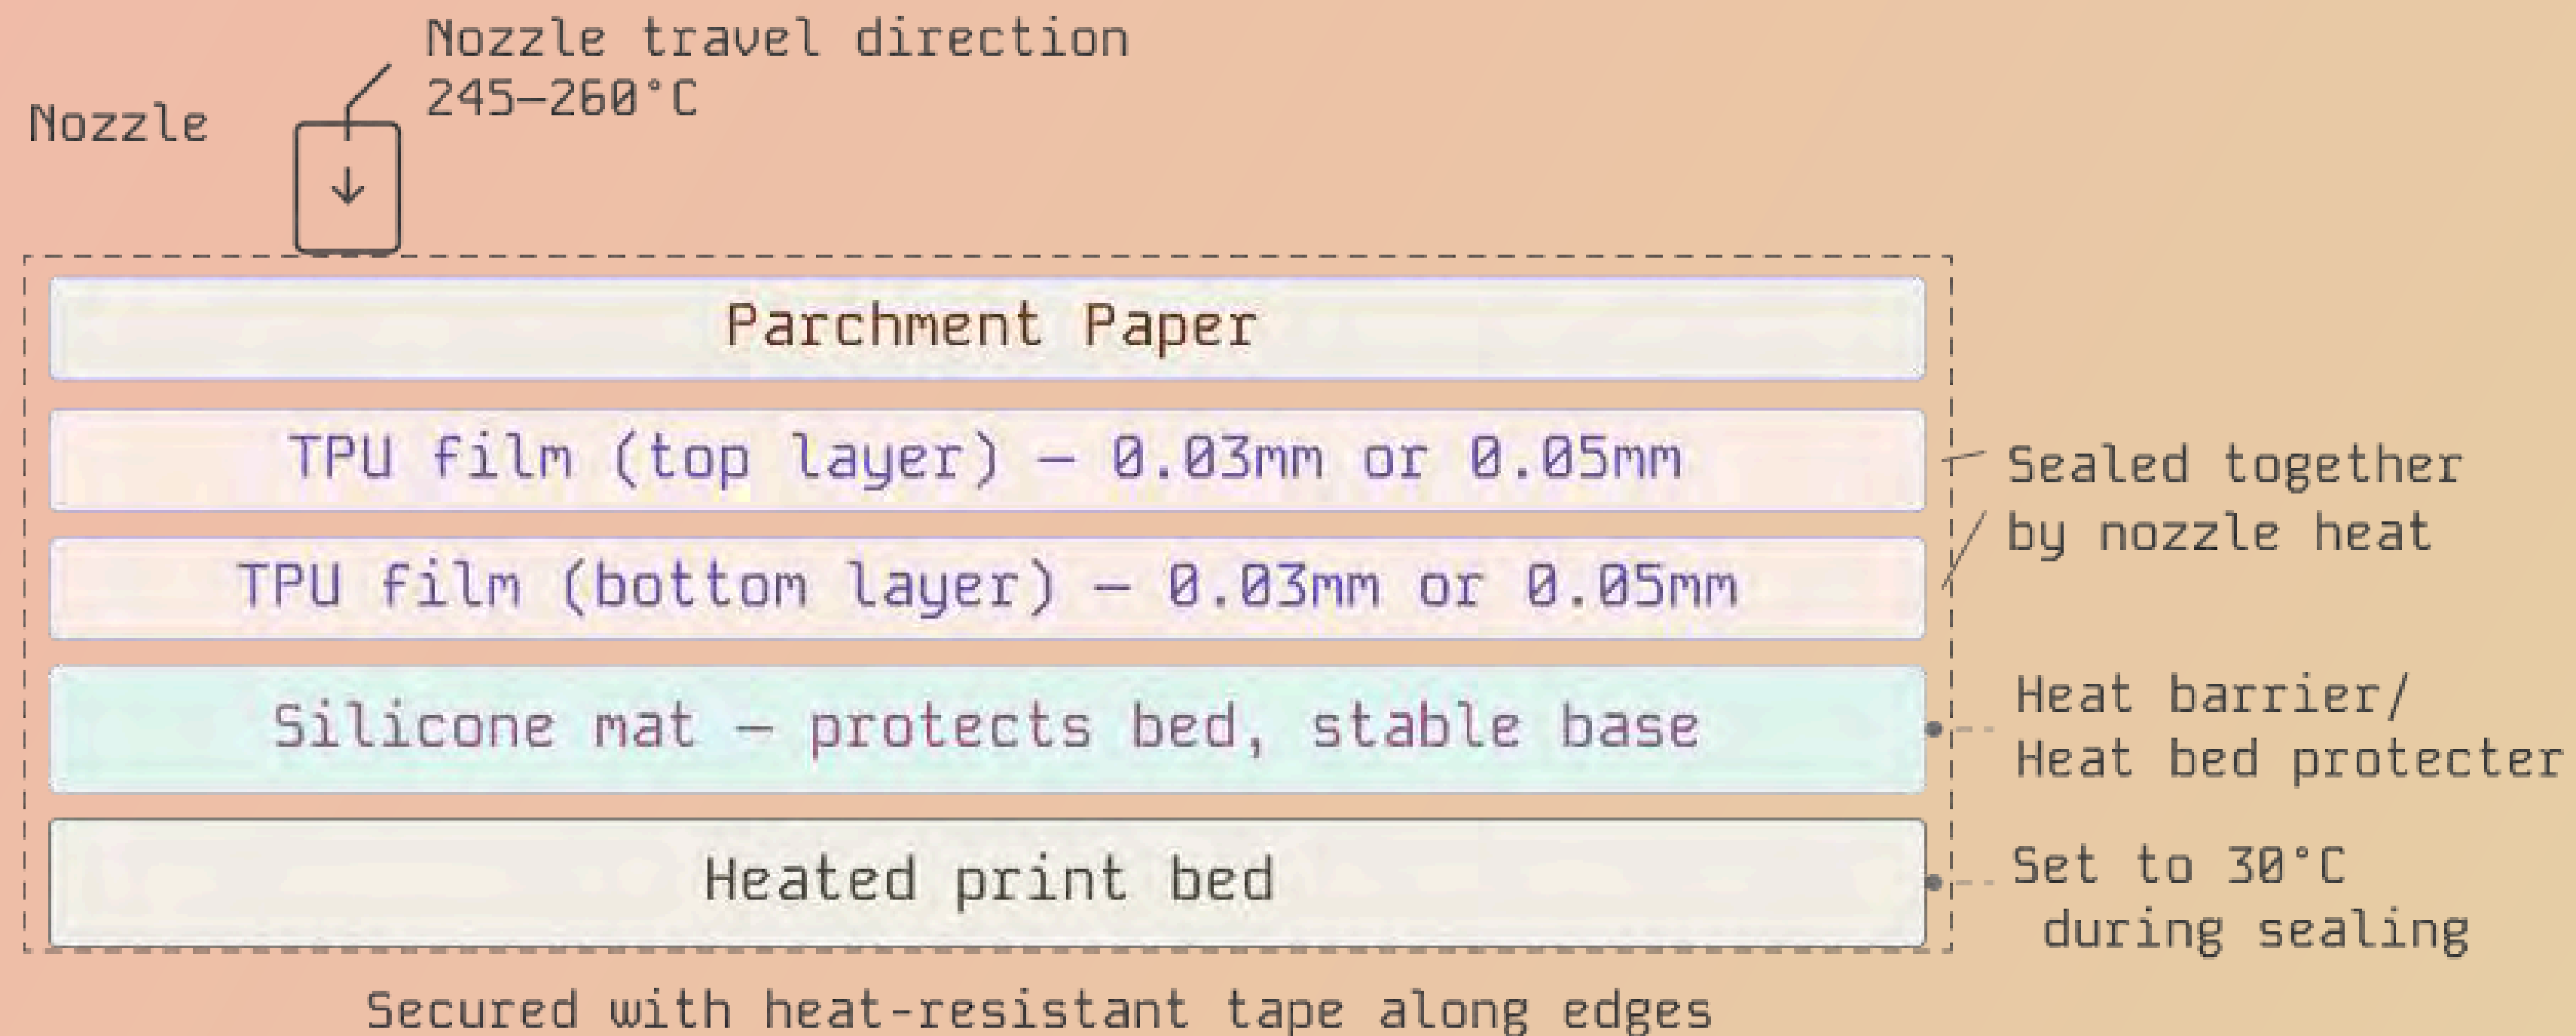

--- Drag this to your Bambu studio and Let the printer do the job!

|                                                                                                                                   |                                                                                                |        |       |

Material layering: sandwich structure on print bed

Cross-section view (not to scale)

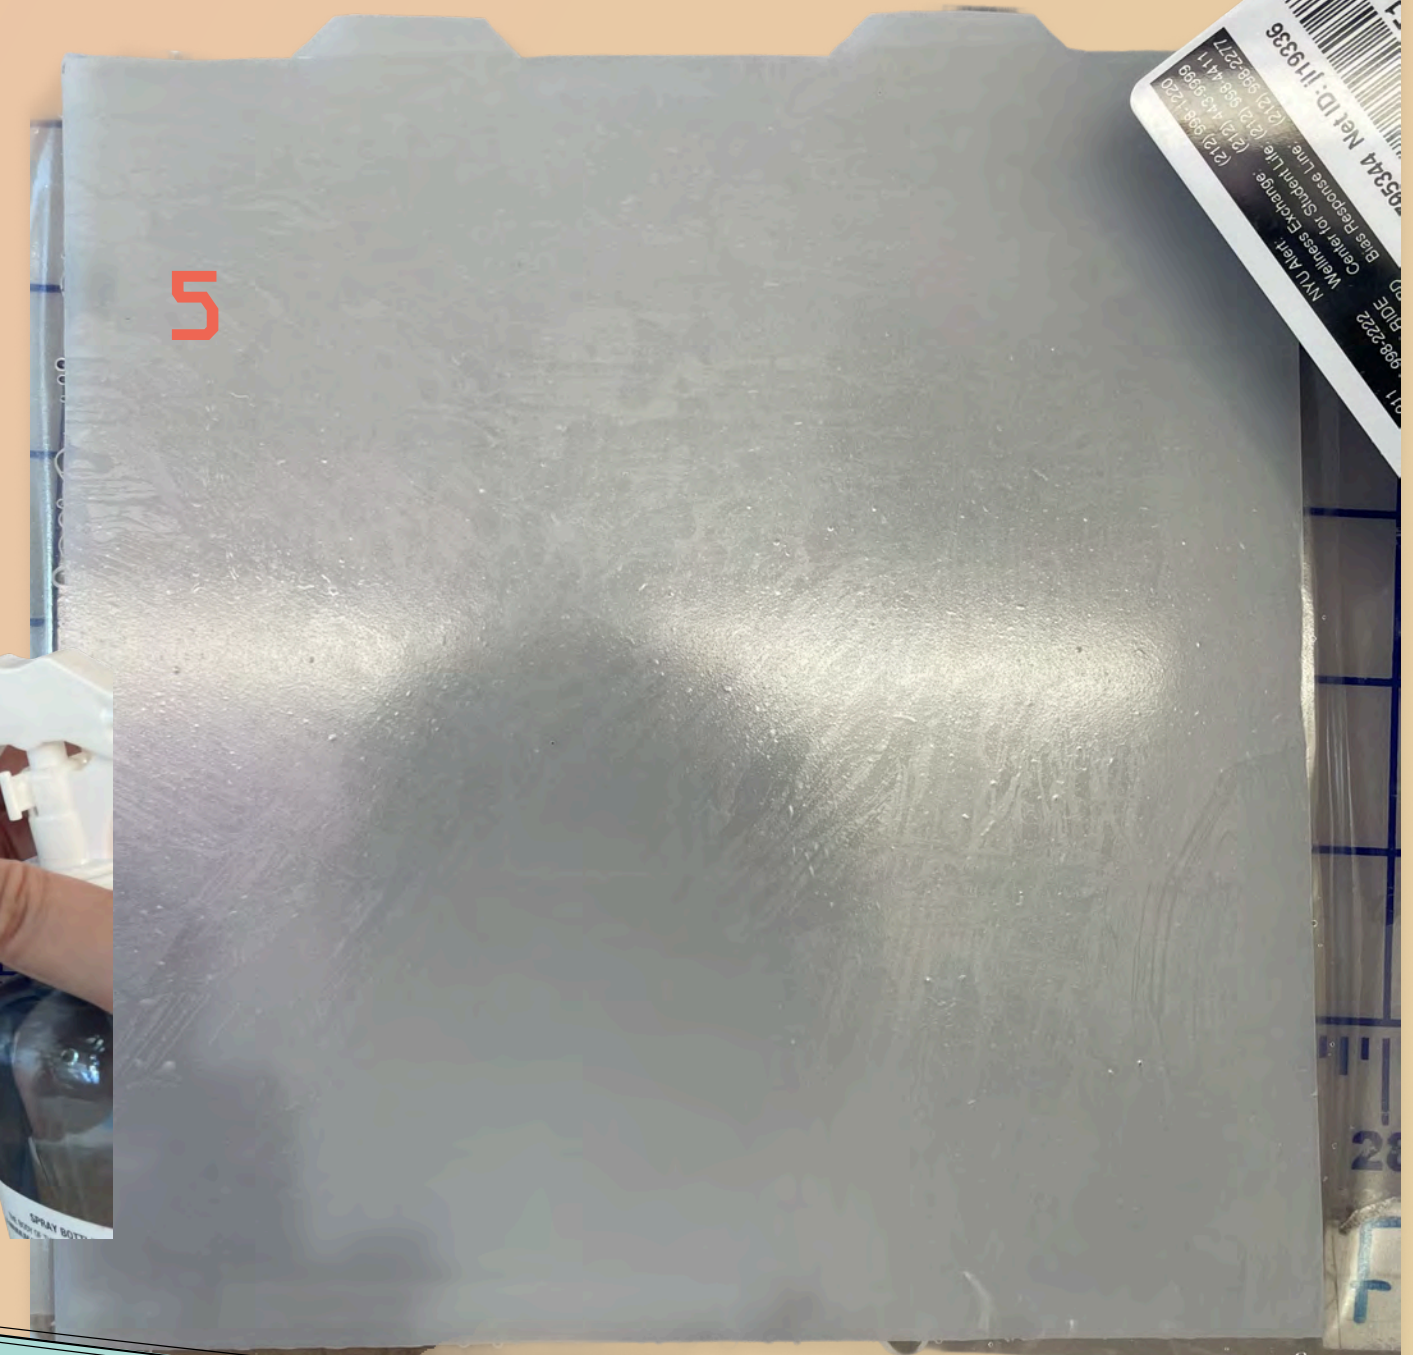

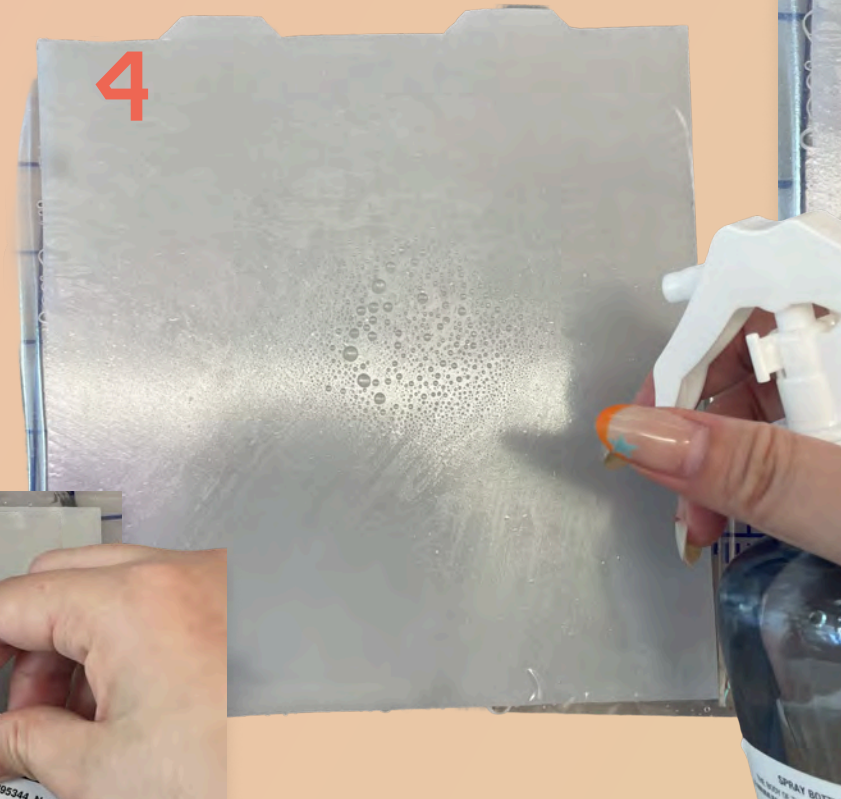

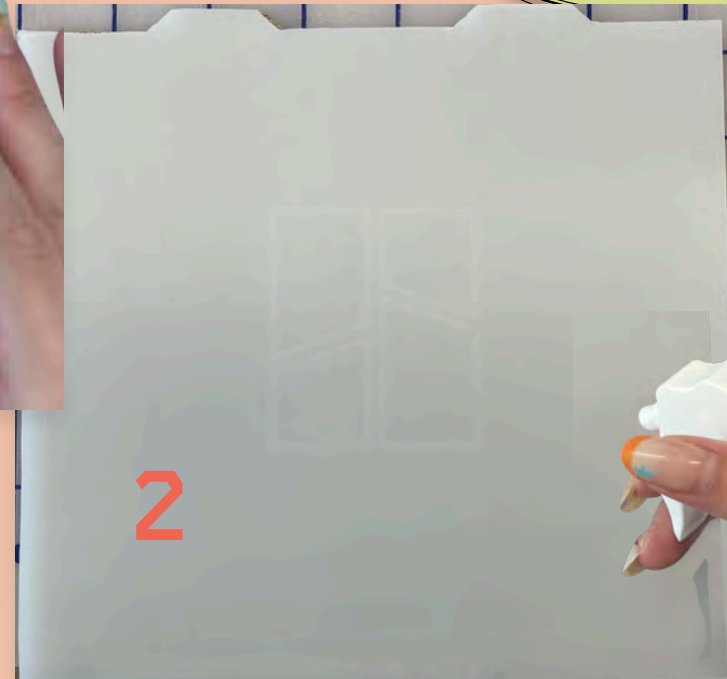

# How to Prepare the plate

# How to Prepare the plate

spray water and  
place the films

grab a plate and  
a silicone mat,  
aline them  
together

Use a card to  
remove any air

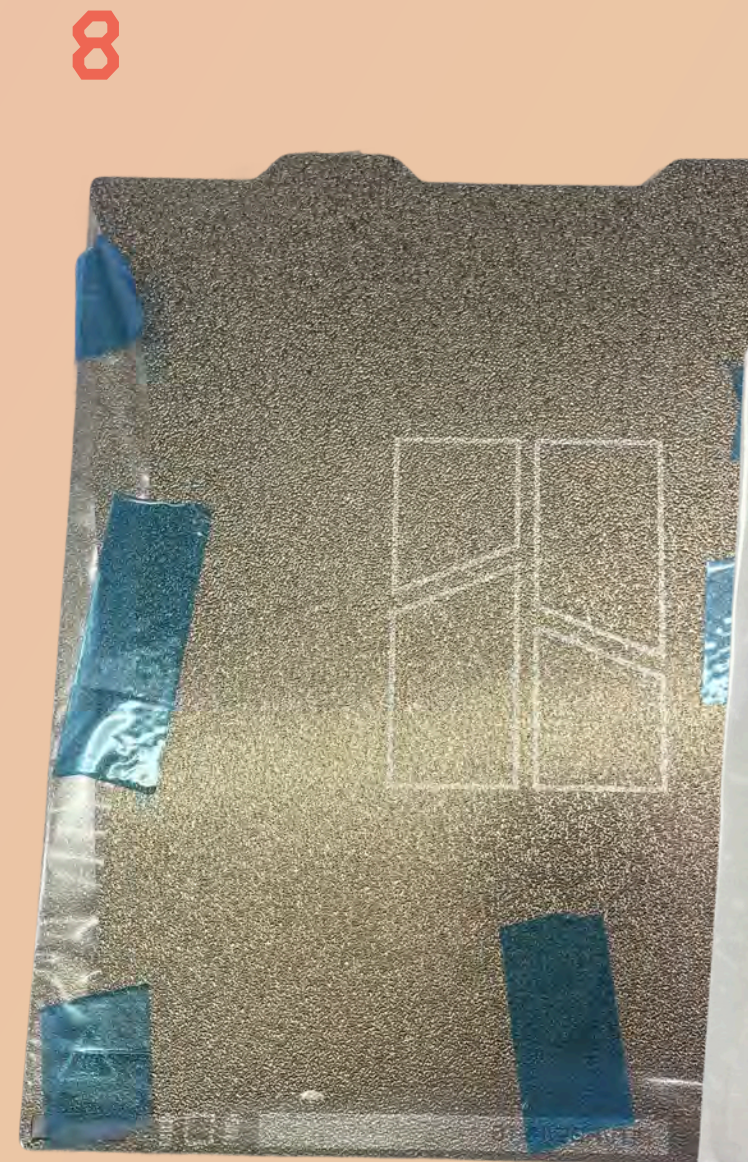

6

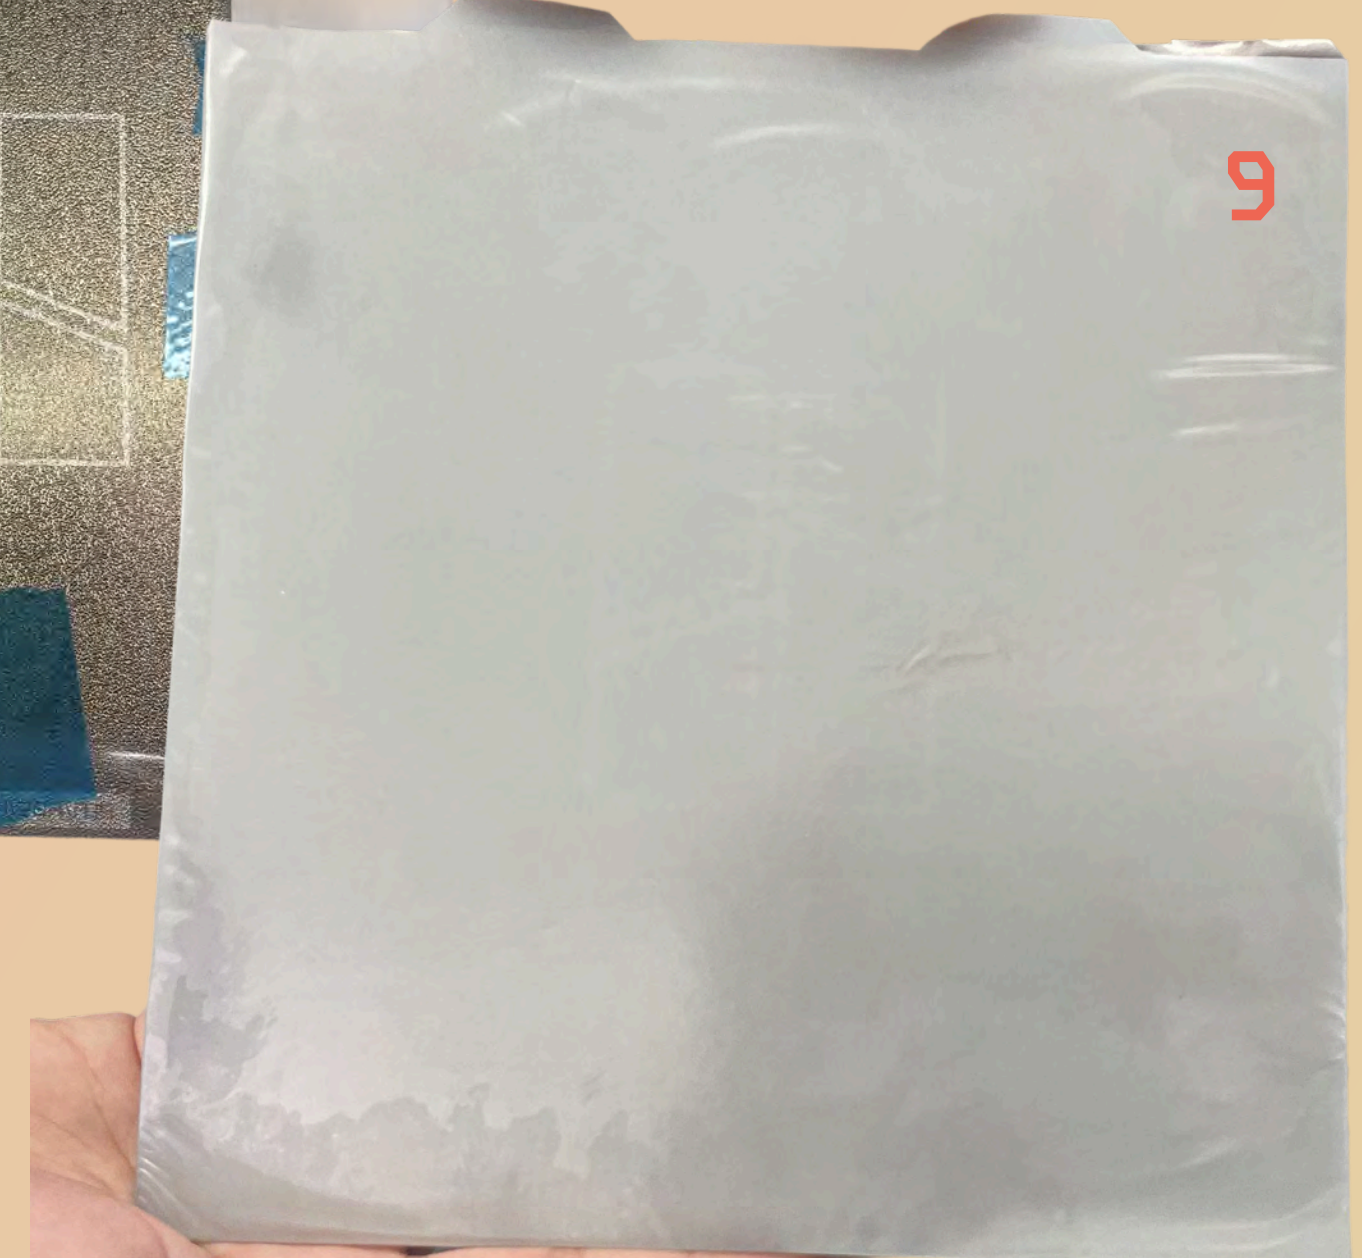

cut off the edge  
and fold over,  
use tape to secure  
it

7

8

9

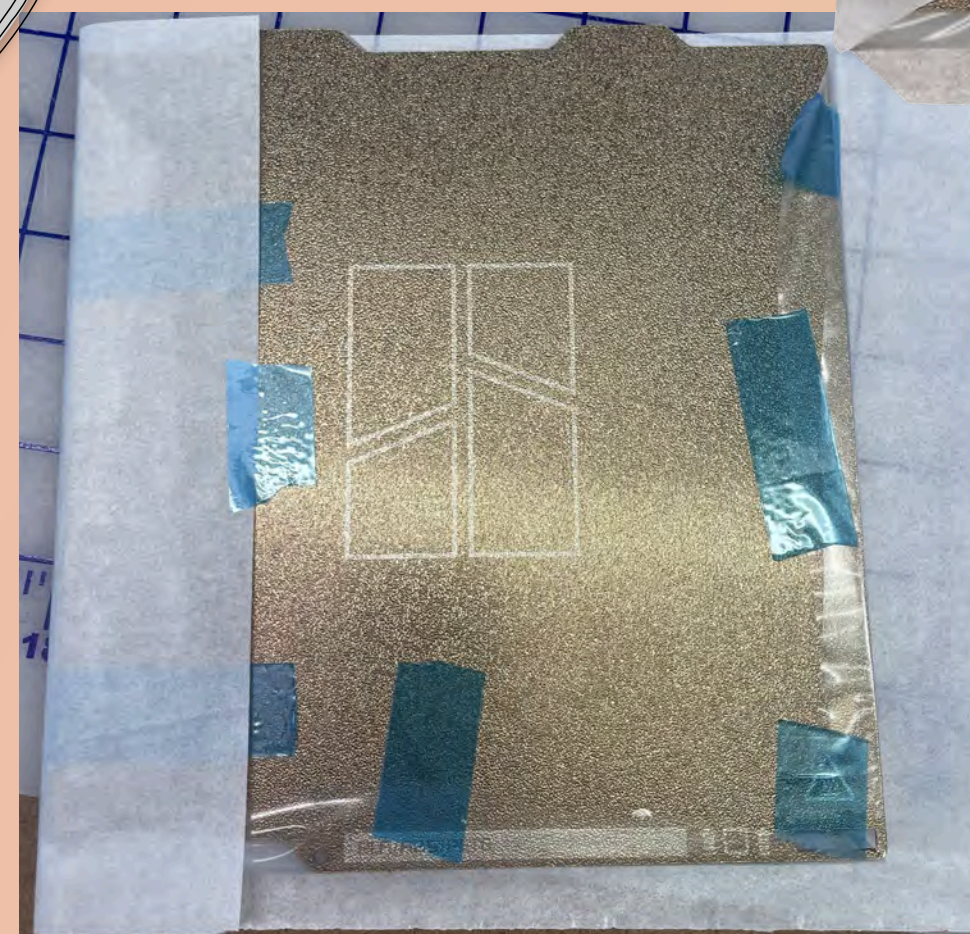

Make sure to be  
bubble free

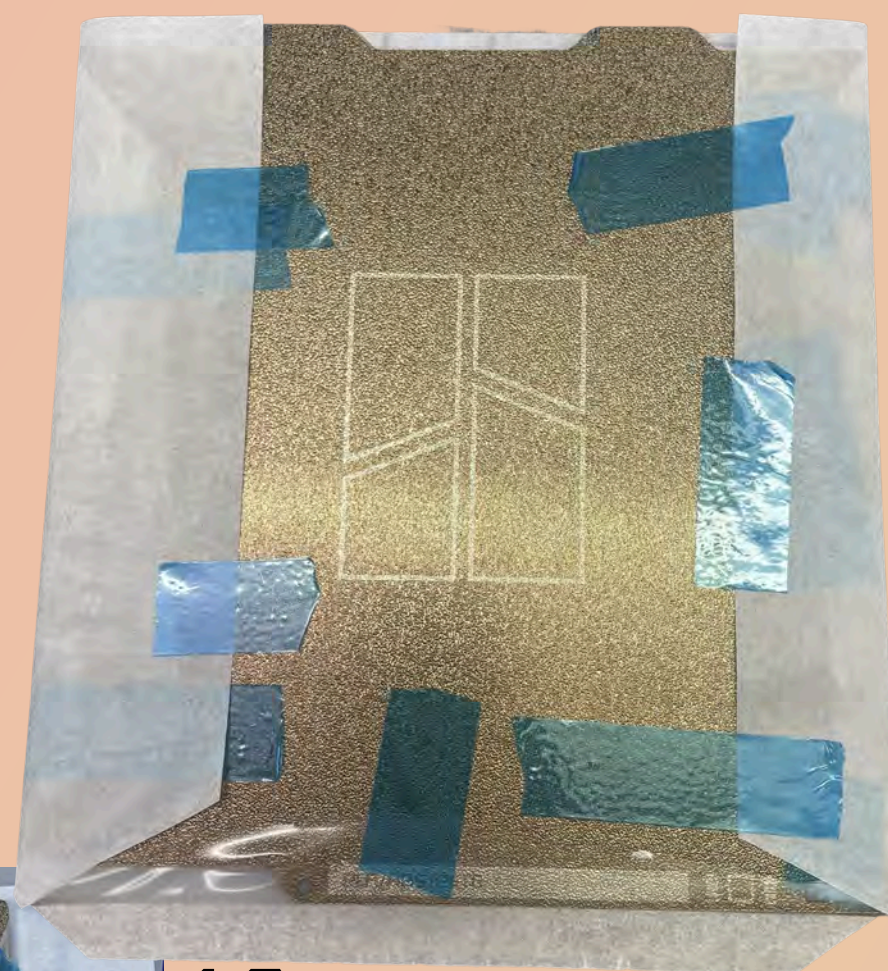

Fold the parchment paper with a inch from the short side

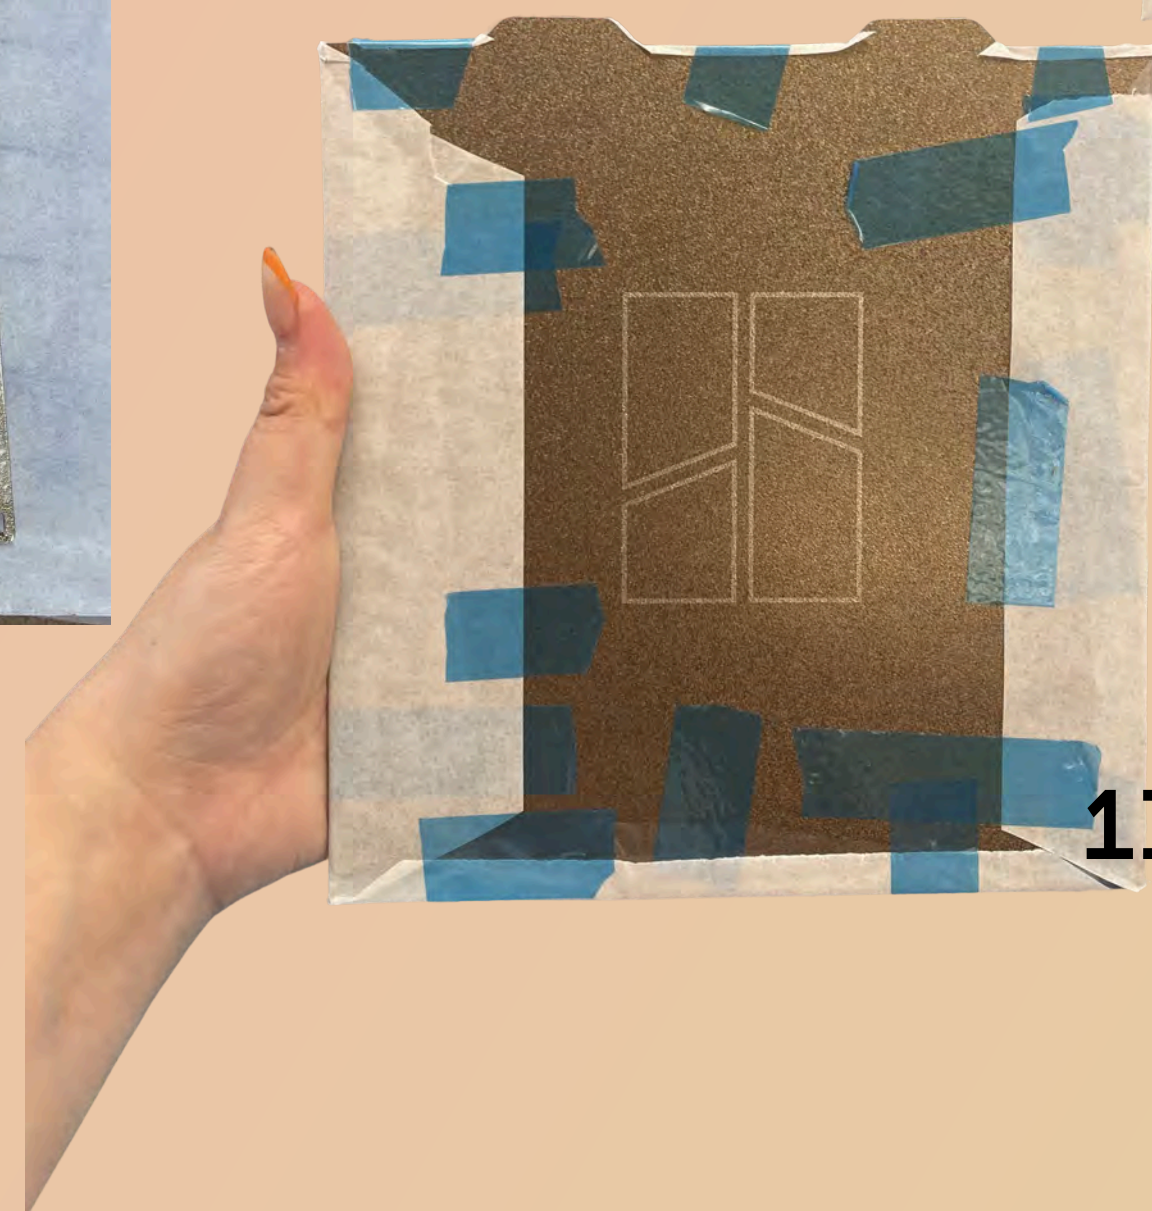

10

11

12

13

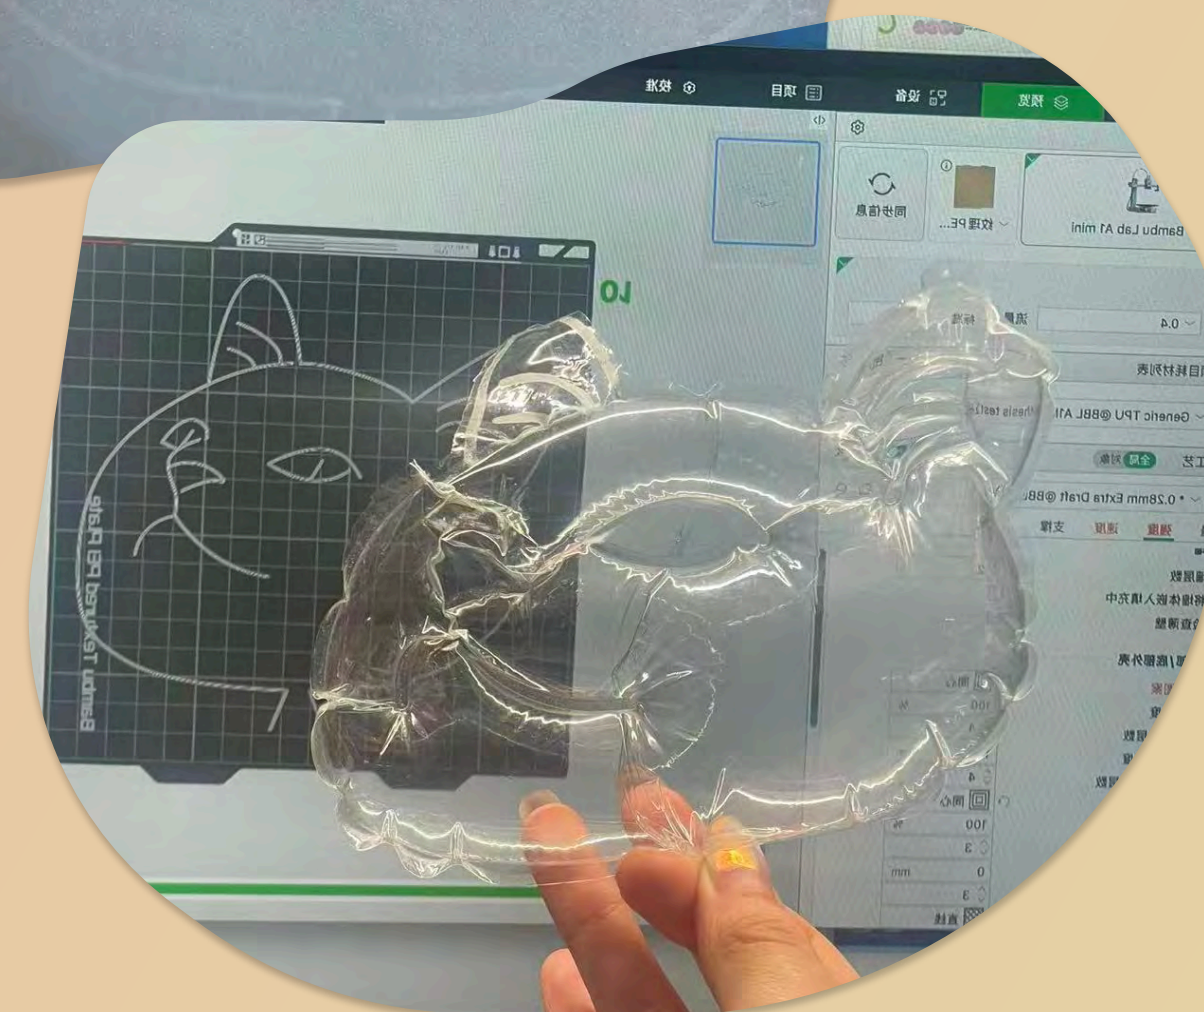

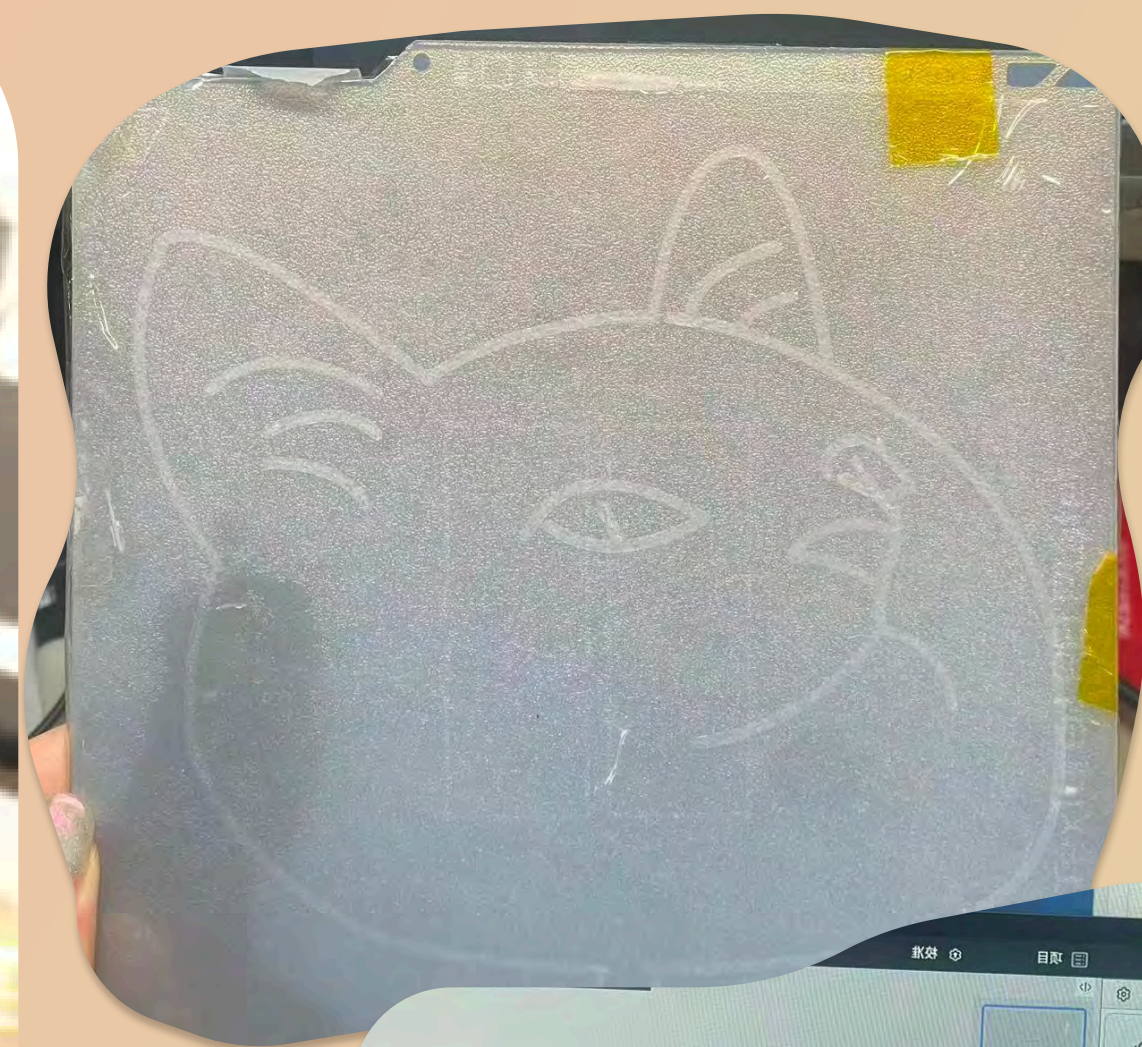

TaDa!!

cut off the edge and fold over, use tape to secure it

5

Let printer do the work

# Play Time!!!

1

Group Up! 4-5 people a group

2

Make your design  
And prepare your 3mf. file

3

Prepare your Plate and Print  
(send your file to [thealujx@gmail.com](mailto:thealujx@gmail.com))
